

Land Owners To Fight Depletion of Water Supply

Randall county land owners in the northwest part of the county have been active during the past week opposing the development of the Amarillo water supply in that section of the county. Following the meeting with the City Commission in Amarillo last week, another meeting was held in Canyon Monday with the Commissioners Court.

According to facts developed by the land owners, Amarillo has pumped out one-third of the water supply under the area upon which the wells are located in the past 22 years. If Amarillo drills the additional thirty wells which are now proposed, the remaining water supply under that area will be depleted within 20 or 25 years.

Whereas Canyon is pumping from the deep water strata, Amarillo is getting her water supply from the shallow strata. According to figures compiled and presented here Monday, Canyon is selling water at approximately one-half the price charged by Amarillo; and Amarillo is making a profit of a half million dollars annually on the water piped from Randall county.

It is charged that the Amarillo wells will take twice the amount of water from under the ground as taken by irrigation wells; that in wet years the water supply is increased when under irrigation, but the city wells continue to take water day and night regardless of the kind of weather; that the proposed 30 city wells will take as much water as 150 irrigation wells.

The land owners are of the opinion that the water should be left under the ground for the benefit of future irrigation, rather than have the area depleted. Practically all feed raised in the Panhandle this year came from irrigation territory.

A report by Col. E. V. Spence on Oct. 13, 1947, is considered authentic when it was pointed out that the area in Randall county would be pumped out in 20 to 25 years, while a water structure northeast of Amarillo is considered inexhaustible.

It was pointed out that in order to secure right of way for the water line proposed by Amarillo that an appraisal board must be appointed, and that Amarillo has the right of appeal if the board finds the damage too high for the city.

Funds are being raised by the land owners to employ an engineer to survey the water supply in the northwest part of the county, and to assist the land owners in their fight to save their water supply for future irrigation purposes.

The only word from Amarillo city officials is to the effect that they intend proceeding with their original plans of developing the water supply in Randall county.

Junior Livestock Show To Be Held Here On Feb. 28

Dr. Jack Miller, head of the Animal Husbandry Department of Texas A. & M. College, College Station, will be in Canyon, Saturday, Feb. 28, to serve as official judge for the Randall County Junior Livestock Show, which is scheduled to be held here on that date.

The show, which is the first of its kind to be held in this county, is being sponsored by the local Lions Club, with Dr. A. K. Knott as president. Boys from the 4-H and F. F. A. Clubs are expected to show approximately 25 calves and 25 hogs.

Milton Morris will be general superintendent of the show, Lonnie Byars, assistant superintendent; Ross Craig and Glenn Dowlen, baby beef; Ted Kelley, E. R. Cleavinger, swine; E. M. (Mutt) Myers, clerk; H. E. Shahan, acting secretary and treasurer, and A. R. Crossland, records.

Cost of the show has been estimated at \$300, it was stated, and \$150 has been received toward this fund. Further contributions for prize money and expenses will be accepted at the First National Bank and at the County Agent's office in the court house.

Funeral Services Are Pending For Lee Jackson Berry

Efforts to locate a brother of Lee Jackson Berry, 61 years old, farm worker found dead at the Frank Talley farm near Bushland have so far been unsuccessful, and funeral rites are pending. The body is at the Griggs-Warren Funeral home awaiting arrangements.

Mr. Berry was found dead Monday morning on the bed at the farm house by Mr. Talley, who lives in Amarillo. Mr. Talley said that he had not visited the farm, where Mr. Berry lived alone, since last Thursday.

Judge B. F. Machen was taken to the ranch by Sheriff M. E. Cantrell, who had been notified of the death by Deputy Sheriff R. M. Allred. Judge Machen, who conducted the investigation, said that death occurred from natural causes, possibly a heart attack. A total of \$1,348 was found in Mr. Berry's pockets.

Mr. Berry, a bachelor, had worked on the Talley farm about eight years.

Amarillo Times Publishes False Statements Regarding Automobile Tag Sales in Randall County

Denial was made Monday of an article which appeared in the Amarillo Times Sunday, written by T. E. Johnson, which indicates Randall County officials of illegal practices in the collection of automobile licenses.

Tax Collector M. E. Cantrell and Deputy R. M. Allred of the office in South Amarillo, deny that any truck, bus or car license was ever offered for sale, or sold to a resident of Potter county at a reduced price; or sold with a promise for returned business on the part of the county; or that threats were ever made against any citizen for the purpose of inducing them to buy license in Randall county.

The above were charges made by Johnson against officers of Randall county.

Johnson claims that Tax Collector Frank Hoyt of Potter county was authority for the statement that Randall county officials threatened operators who did not register vehicles here. This is emphatically denied by Hoyt.

The charge is made by Johnson that the tax office was established in South Amarillo by Randall county for the purpose of soliciting automobile tax money for Randall county. R. M. Allred is in charge of that office.

Mr. Allred stated emphatically Monday that he had never solicited business from Potter county residents.

Bufs Down H-S Tuesday; Face Mines Tonight

The Buffalo basketball team defeated Hardin-Simmons University of Abilene Tuesday night at Burton Gym by a score of 51 to 39. The Bufs had lost the first game with Hardin-Simmons at Abilene.

The Bufs will meet the conference leaders, Texas College of Mines, at Burton Gym on Thursday night. The Mines have been going strong this season, and a hard game is expected. It will be the first meeting of the two teams this season.

Two games will be played at Burton Gym next week. The Bufs meet Tempe on Wednesday night and Flagstaff on Thursday night. Both teams defeated the Bufs on the recent swing through Arizona.

Two Girls Injured In Car Accident

Two girls received minor injuries Sunday night when the car in which they were riding was in a collision with another car near Umbarger.

They were Miss Helen Brashears, 15 years old, of Dimmitt, and Miss Thelma Roberson, 16, who lives between Hereford and Dimmitt. They were taken by Griggs-Warren ambulance to the Nebbett hospital for medical attention.

Driver of the car in which they were riding was Paul Acker, 24, of Nazareth who was uninjured.

The group was going toward Canyon when the wreck occurred. The occupants or the other car were not injured.

BOX SUPPER AND DANCE

Mrs. J. V. Williams, chairman, has reported that funds raised from the box supper held recently for the Park Community totaled \$171. Donald Ladehoff gave a dance at the Park School which brought in \$23.

PROCLAMATION

WHEREAS, February 8, 1948 is the 38th anniversary of the founding of the Boy Scouts of America which has been chartered by the Congress of the United States, and

WHEREAS, the Scout Program has affected the lives of 14,000,000 American boys and men since its inception, and now has an active enrollment of more than 2,000,000, and

WHEREAS, the skills and experiences acquired through Scouting are great influences for building young Americans into men and participating citizens, thus making an incalculable contribution to the civic enterprise of this and countless other communities, and

WHEREAS, the Boy Scout Movement is a great factor for the promotion of World Peace, and marks this anniversary with the theme, "The Scout Citizen at Work . . . in his home . . . in his community . . . in his nation . . . in his world," with practical assistance to brother Boy Scouts overseas to rebuild their organizations;

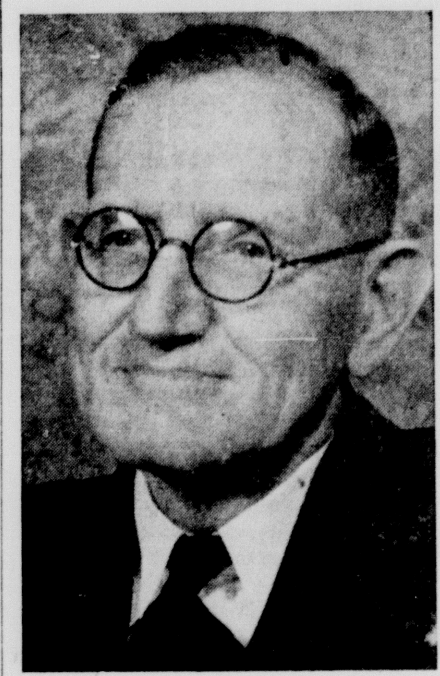

NOW THEREFORE, I, W. A. Warren, Mayor of the City of Canyon in the State of Texas, do hereby proclaim the week of February 6th to 12th as Boy Scout Week and urge our citizens to recognize the unselfish service of Scout leaders, and to do all in their power to help promote this fine program among our youth.

IN TESTIMONY WHEREOF I have here unto signed my name officially and caused the Seal of the City of Canyon to be affixed, this 5th day of February, 1948.

(Seal)

(Signed) W. A. WARREN, Mayor.

A. B. Haynes Is Candidate Office Commissioner No. 1

A. B. HAYNES

A. B. Haynes has authorized the following announcement for the office of County Commissioner, Precinct No. 1:

I hereby announce my candidacy for County Commissioner, Precinct Number 1, subject to the Democratic primary.

I have been a citizen of Randall County off and on for forty-four years and for forty - two years I have been a continuous property owner and tax payer in the county and in the precinct, so have been vitally interested in the county's welfare during the years I have lived out of the county.

I believe I am competent to discharge the duties of this office and will appreciate your vote and cooperation, and if elected will devote my time and ability to furthering the welfare of the precinct and of the county.

I shall try to see every voter of the precinct before the election but I invite you to inquire of those who have known me all these years as to my ability, and fitness for this office.

A. B. Haynes

Boy Scouts To Help Save Food Aid to Europe

More than 2,120,000 members of the Boy Scouts of America throughout the nation will observe the 38th anniversary of the organization during Boy Scout Week which opens Friday, Feb. 6 and continues through Thursday, Feb. 12.

The anniversary will be celebrated in every city and town and most villages and hamlets throughout the nation and its possessions. It is young America's largest birthday celebration.

The theme of Boy Scout Week this year is, "The Scout Citizen at Work . . . in his home . . . in his community . . . in his nation . . . in his world." Scouting activities for the year beginning with the birthday celebration will be related to this theme.

The nation's Boy Scouts are engaged in the program of saving and producing food to alleviate the world's food shortage. As part of their service program this year each Boy Scout is expected to "save a bushel, share a bushel" of food.

Each Cub Pack, Boy Scout Troop, Senior Scout Unit, will share in a "Report to the Nation" that will tell of their community services last year and their program for this year. The report will be made to the President of the United States, to Congress and to the United Nations.

In addition to conserving food and natural resources, the Boy Scouts will emphasize safety and fire prevention, home repairs and personal health. Through their World Friendship Fund of voluntary gifts the Scouts have sent more than 3,000 tons of supplies to help Scout organizations overseas to rebuild. This aid is to be continued throughout 1948.

Mr. and Mrs. Cecil Hagood of Floydada and Mrs. Martin Phillips and son, George, of Plainview were in Canyon Sunday to visit in the parental Worth A. Jennings home.

Major and Mrs. Alton Donnell and children of Washington, D. C., spent several days last week visiting in Canyon with his parents, Mr. and Mrs. L. A. Donnell.

Moisture During Week Helps the Wheat Outlook

The wheat prospects of Randall county was greatly improved by the snows of January. Snow has stayed on the ground for nearly two weeks, with the fields getting full value of the moisture.

The total moisture received in Canyon during January measured .78 of an inch.

The first moisture was received Jan. 1, amounting to .25 of an inch. Snow fell on Jan. 23, 24, 28 and 29, bringing a total of .53 of an inch.

It is estimated that Randall county will have about 270,000 acres of wheat this year. Of this amount, about 150,000 acres have been seeded; 100,000 acres volunteer; and from 40,000 to 50,000 acres summer fallowed in the county.

The seeded wheat was needing moisture very badly as the year opened. January has been favorable for wheat.

Near zero weather last week, with snow covering the ground, followed by the higher temperature of this week which melted the snow gradually, was welcomed by the wheat farmers.

W. T. Band Will Present Annual Concert Tuesday

Annual winter concert of the West Texas State College Concert Band will be presented under the direction of M. J. Newman, Tuesday evening, Feb. 10, at 8 o'clock, in the Administration Building auditorium. Matilda Gaume will be guest soloist for the occasion.

The public is cordially invited to attend this first formal concert of the Band. An effort has been made to program music which will interest persons of all tastes, from the most serious of the classics to ultra-modern blues and swing. There will be no admission charge.

Included on the program will be: The Purple Carnival, Harry I. Alford; Finale, from Symphony No. 1 in E Flat, Camille Saint-Saens; The Elder Statesman, Earl D. Irons; The "Little" Rhapsody in Blue, George Gershwin; and Cole Porter Songs, Symphony Arrangements by Russell Bennett.

The second formal concert of the Band's 1947-48 season is tentatively scheduled for the first week in April.

A. A. U. W. Hears Texas President As Guest Speaker

Dr. Pearl O. Ponsford, president of the Texas Division of the American Association of University Women, was the guest speaker at a luncheon Saturday, given by the Canyon Branch at the College Cafeteria. Special guests were Dr. and Mrs. J. A. Hill and Mrs. James P. Cornette.

Dr. Ponsford made official visits to branches in the Panhandle last week. She is a member of the English staff in the College of Mines, El Paso.

She attended the meeting of the International Federation of University Women held at Toronto, Canada, last August and the Latin-American Conference in Houston last month. Dr. Ponsford emphasized the international aspects of the A. A. U. W. program and pleaded for an informal membership which could attack aggressively problems of the day.

During her visit on the campus Dr. Ponsford conferred with President Hill and Dr. James P. Cornette concerning national membership for West Texas State in A. A. U. W. She also met with local board members of the Canyon branch of the A. A. U. W. of which Miss Ruth Lowes is president.

Mr. and Mrs. Hugh Greiner and sons spent one day recently visiting with friends in Pampa.

Chamber of Commerce Elected New Directors and Officers Thursday To Work For the Coming Year

OFFICERS

Directors for the Chamber of Commerce were selected Thursday night, following a report of the nomination committee composed of C. L. Thompson, Dr. R. A. Nebbett and W. J. Wooten.

New directors named were: Elmer Wooten, Herschel Coffee, John Hammond, Joe Baber, Newton Crain, D. K. McCaskill, Clyde Warwick. Holdovers are: E. R. Cleavinger, Delbert Lowes, Ray Campbell, Jack Neil Jennings and Lee Foster.

Officers selected by the new directors are:

E. R. Cleavinger, President.
Delbert Lowes, 1st Vice President.
Ray Campbell, 2nd Vice President.
Jack Neil Jennings, Secretary.

Due to the fact that a community banquet was held in January when Dr. James P. Cornette was introduced, the annual Chamber of Commerce dinner will not be held this spring.

In order to assist Company E in getting organized, the Chamber will pay the \$2.00 physical examination fee for the first 50 men who enlist in the company.

According to a financial report submitted, the Chamber had a balance of \$2,408.07 on hand at the first of the year; collected \$4,029.50 in dues during the year; and had a cash balance of \$1,967.80 on January 1, 1948. A detailed financial statement will be mailed to each contributing member of the chamber.

Record Number of Poll Taxes Paid in County

Randall county will have a record number of voters eligible for the elections of 1948.

Poll taxes and exemptions issued this year total 3325. There are more than 300 over age men and women who are not required to secure exemptions. This will bring the total potential vote to more than 3600 in Randall county.

In South Amarillo a record number of poll taxes and exemptions were issued, numbering 1485. Due to the fact that this section of the county is in Amarillo all over age citizens were required to secure an exemption.

Poll tax receipts and exemptions for under ages in Canyon totaled 1840. It was not necessary for over age persons to secure exemptions in Canyon. There are probably more than 300 persons over 60 years of age who were not required to secure a poll tax exemption, and this will bring the voting strength up to around 2140 in Canyon boxes outside of South Amarillo.

Tax Collector M. E. Cantrell stated Monday that the county ran out of both poll tax receipt blanks and exemption blanks and had to issue temporary receipts until a new supply could be printed. This is the first time that the county was faced with such a situation.

Stork Specials

A daughter arrived for Mr. and Mrs. A. J. Sullivan in Nebbett hospital, Jan. 30.

Mr. and Mrs. Alvin Friemel are the parents of a son, born Jan. 29.

Mr. and Mrs. Harold Denny of Vega are the parents of a son, Jesse Steve, who arrived in Northwest hospital in Amarillo, Jan. 9. Mrs. Denny will be remembered as the former Frankie Lou Goettsch.

Mr. and Mrs. Glenn Thomson are the parents of a son, who arrived Jan. 28. The baby has been named Richard Wayne. Grandparents are Rev. and Mrs. Hubert Thomson of this city.

Divorce Suit In District Court Has Consumed 3 Days

The divorce suit of Ray Christopher vs. Wilma Sue Christopher started in District Court Monday and has been before the jury since that time.

The suit is over the control of a daughter. The child was here Monday, but took down with chicken pox Monday night and will be unable to testify. Both parents are calling for her as a material witness in the case.

KILLED IN ACCIDENT

Funeral services for J. Wayne Williams, 38 years old, killed in an auto accident Tuesday night near San Angelo, were conducted Saturday in the Stratford Baptist Church. Surviving are his wife, a daughter, Christine, and a son, Rex.

Mr. Williams will be remembered by many residents of this city. He lived here for a number of years with his parents, and he and his wife resided in Canyon about ten years ago for several months.

Local Residents Receive Injuries In Head-on Crash

Mr. and Mrs. T. H. Knighton and Jack Neil Jennings received minor injuries in a head-on car crash north of Tulla Monday morning. Driver of the other car was Charles A. Eichelberger, Lubbock salesman, who suffered head and chest injuries.

They received emergency treatment for cuts and bruises at the Swisher County hospital and were brought on to Canyon. Mrs. Knighton is a patient in Nebbett hospital where she is receiving medical attention. Mr. Eichelberger is in St. Anthony's hospital in Amarillo, where his condition was reported as improved yesterday morning.

Mr. Knighton's 1946 Plymouth sedan was badly damaged in the collision. He was driving south, and Mr. Eichelberger was going north in a 1947 Chevrolet when the accident occurred about 8 miles north of Tulla, according to officers.

MARRIAGE LICENSES

Brooks Alfred Altman to Ruby Lavern Bennett, Jan. 28.
George D. Peters to Mrs. Marcella L. Dennis, Jan. 28.
Harry McAllister to Mildred Althea Rumans, Jan. 28.
Arthur L. Edmondson to Lois Irene Nance, Jan. 30.

Editorials

The Chamber of Commerce has elected a group of new directors for the coming year. The cynic often takes the position that the Chamber is a sort of local necessary evil which accomplishes little during the course of the year. If that individual will look at the finances, he will wonder just how much any institution could accomplish on so small an investment. So far as Canyon is concerned, the community has reaped a very large reward for the investment that it has made. The directorate of the Chamber has a large number of young, enthusiastic young men who are ambitious to make Canyon a better place in which to live. Each one has a desire to improve business, social, religious and educational conditions in Randall county. That is quite a problem with so small support from so few people. If you are a citizen who wants to see Randall county improve, with better public and private facilities, join up and invest some of your time and money in the Chamber.

The Panhandle Hardware and Implement Association will meet in Amarillo next Monday and Tuesday. It is one of the really great organizations of Texas, and is attended by practically all those engaged in this line of business. Naturally behind every live organization there is wise direction. In this instance the moving force behind the hardware and implement dealers comes from Canyon. For more than 25 years Clarence Thompson was secretary and inspiration of the association. In recent years Mrs. Clarence Thompson has taken over and is doing a whale of a job. The association is the largest in its 39 years of service. Mrs. Thompson has been responsible for the recent growth and expansion of the facilities of the organization.

Will the Republican party wreck the Marshall Plan? GOP leaders in Congress are thought to be gunning for the Plan under the guise of economy. Perhaps President Truman has been a little over enthusiastic in his financial demands for the Marshall Plan, asking for more than he expects. You will recall that the Republicans wrecked the Wilson League of Nations and sowed the seed which made World War II possible. Are we going to have World War III because of leadership within the Republican party? Democratic orators have something to talk about in the 1948 election.

Those in the administration who have been gambling in commodities did behind the excuse that they broke no law. True enough. You can gamble on commodities all that you want, but don't get caught shooting craps. This is a form of legalized gambling, the same as horse race betting. However, it is a crying shame that such practices are legal, and there is nothing that one can do about it. The Republicans are not going to stop gambling on commodities, since more of that party play the markets than do Democrats.

Gandhi seemed to have been the only person who could hold all of the conflicting forces of India in check. He opposed violence, which was something new to a blood-thirsty people. Various predictions are made as to what will now happen in India. Authorities believe that India could be the powder key to touch off another World War. Frankly we are of the opinion that no incident could start another world war. The nations of this world are prostrate as a result of the last conflict—one which is not yet over. The spirit of Gandhi may live on and on throughout the ages.

That fellow Stassen may never be President, but he is sure a fighter. He is going into Ohio to mix it with Senator Taft, and he is gunning in the "sure" Dewey territory. Stassen is a progressive Republican, if you can feature such an animal in times like these. His program would make him a good Democrat, if he choose to switch political horses.

Boy Scout Week is being observed in the nation this week. There has been a lot of discussion regarding the youth problems of the nation.

Placed as an Outstanding Weekly Newspaper in "Editing The Day's News" in 1943.

One sure way to solve youth delinquency is to get all boys in the Boy Scouts; and all girls in the Girl Scouts. The nation will probably never appreciate the good work that is being done by these two fine organizations. Perhaps that is why we are putting up so little money to aid these organizations. Just check on the record of boys and girls who have been trained in these organizations. You will find the finest men and women in your community. These chaps never get into trouble. They are given training which stays with them throughout their later life.

Texas is not the only state which is having trouble with Negro higher education. One who knows nothing about the Negro problem can probably give more advice which is wrong, than those who have had to deal with the race problem. So, therefore, we venture the opinion that the Negro question would soon solve itself so far as the institutions of higher learning are concerned if the bars were thrown down and the Negroes allowed to enter. Only a very, very few of the race would aspire to go to these institutions. Is that sense, or nonsense?

The Southwest has been going through an unprecedented situation. Near zero weather is nothing uncommon for Texas. But running low on natural gas is something new. The population of West Texas has more than doubled since gas became the universal fuel. This simply means that before another winter comes around that the pipe lines to feed fuel to the towns of this Southwest must be increased. It is claimed that there is no shortage of supply, simply a case of lack of transportation facilities in order to heat the towns properly.

The wheat situation in Randall county has been improved by the snows. There is enough moisture in most places over the county to carry the wheat until spring rains come. The world needs the wheat that could be produced in Randall county. Here's hoping that those spring rains will be bountiful.

PLAIN TALK ON OIL

The American Petroleum Institute has published a booklet which explains some of the facts of life as they apply to oil.

Our thirst for oil has attained almost incredible dimensions. America alone consumes more of it than was required by the entire world only ten years ago. The peak reached in wartime was below the present level. And the United States is consuming 28 times as much oil per person as the rest of the world.

The industry, recognizing its obligations, is engaged in a \$4,000,000,000 expansion program which is going forward as rapidly as the necessary materials can be obtained. It has managed to build up oil reserves to a new high level—a remarkable achievement in the light of consumption figures. And, finally, it is developing foreign oil resources which will ultimately relieve much of the pressure on our domestic facilities.

There hasn't been a severe oil shortage—which is a testimonial to prior planning by the companies in the "tight" areas. Reasonable conservation by the using public will prevent a shortage in the future. The public is asked, for example, to keep room temperatures in homes using oil heat to 68 degrees, and to resist the urge to speed in automobiles.

All the indications are that the demand for oil will continue to rise. And the industry is expanding daily to carry the load.

YOUR TAX BILL

The Committee for Economic Development—an organization which issues non-partisan, objective studies on basic economic issues from time to time—has produced an exceedingly interesting monograph on "Taxes and the Budget." As in the case of its previous monographs, the subject was selected by the businessmen who make up its research and Policy Committee, and the study was then made by a group of qualified scholars drawn largely from leading universities. The purpose of the current monograph is to point the way to a long term government fiscal policy, which will remove the problem from the realm of partisan politics and make possible a sustained prosperity in a free economy.

The influence of fiscal policy on inflation and deflation, employment and unemployment, and all other economic trends, is almost limitless. The manner in which the government taxes, spends and borrows directly or indirectly affects every enterprise and every producer. The size of the public debt, its form, and the distribution of the obligation, strongly influence individual and business spending—and, of course, the commodity price of structure. And, equally obviously, the weight of taxation vitally affects the "willingness of individuals to devote effort, imagination and capital to increased production." Thus, government fiscal policy is not a remote and abstract matter. To the contrary, it is of intense personal significance to all.

The monograph in question observes that four considerations are of supreme importance in the development of budgetary policy. First, Federal finance should help to make fluctuations in total demand less severe, and thus aid in stabilizing employment and prices. Second, budgetary policy should serve to restrain unnecessary government expenditures and to stimulate efficiency. Third, it should provide for the reduction of the public debt under conditions of reasonably high employment and production. Fourth, the policy should recognize that it takes time to make most fiscal decisions and observe their effects, and that our ability to accurately forecast economic fluctuations is still very low.

The study goes on to point out that there are three distinct alternatives in budgetary policy. First, there is the annually balanced budget, which attempts to balance revenues and expenditures, regardless of economic conditions. Then there is the managed compensatory budget, which attempts to adjust spending and tax rates as often as is necessary to keep employment or the national income steady at a high level. Third, there is the stabilizing budget, whose purpose is to set tax rates to balance the budget and provide a surplus at agreed high levels of employment and national income and thereafter leave them alone unless there is some major change in national policy or the conditions of our national life.

The authorities who prepared the study believe that annual budget balancing is unworkable because, among other reasons, it would require the changing of tax and spending programs at time and in directions most harmful to high employment and stable prices, and would involve irregular and unpredictable variations of rates with unsettling effects on business and individual planning. It believes the managed compensatory budget also unworkable, because it would depend upon an impossible degree of accuracy in forecasting business fluctuations, and because, again, tax rates would be subject to frequent and unsettling changes. Finally, it offers the stabilizing budget policy as the best available solution.

This budget is simply explained. Tax rates would be established for a long period of time, and it is recommended that the rate be sufficient to yield a surplus of about

\$3,000,000,000 at a national income corresponding to employment of about 96 per cent of the labor force. That would mean a balanced budget, without surplus or deficit, if unemployment rose to four or 4½ million people. Surpluses would be used to retire the debt, and not to increase current spending. At the end of five years or so, the tax rates would be reviewed and raised or lowered as the case might be. Frequent changes would be made only if some emergency made them desirable or necessary—for example, a war, or an economic crisis of great magnitude.

This policy would give us a genuine fiscal program "as distinguished from a series of unrelated fiscal actions." It does not depend upon economic forecasting, which is the most hazardous of occupations. It recognizes the interdependence of all aspects of economic policy, and is designed to contribute to the goal of full employment. It would lay the groundwork for orderly and steady debt retirement. Business and individuals would be able to plan with greater confidence, in that they would know just what tax rates they would pay for years to come, and they wouldn't have to watch Congress each year to see if the burden was to be raised or lowered. Lastly, the policy can be given the inherent flexibility that is needed in a changing and unpredictable world.

I have been looking over some recent Gallup Polls. I find that 26% of Americans can't name the national anthem; 36% think the Democrats control the House of Representatives; 52% don't know that England is a democracy; 25% don't know what the Truman Doctrine is; 51% don't know about the Marshall Plan.—Lewis W. Conover, Springfield, Ohio.

The chief excuse for movie directors is that someone has to stay on the set to keep the actors from quitting ahead of time.—Nunnally Johnson, Hollywood movie writer.

I eat chicken five times a week. Especially am I intrigued by chicken fricassee. I wonder what it is made of?—Andrei Gromyko, Soviet delegate to the U. N. Security Council.

On Valentine's Day, show some affection
Oil-Plate your car for extra protection!

Is your car a new "sweetheart" or a steady "old beau"?
It makes no difference which, if you're in "the know."
For cars can be human—like a sweetheart or wife,
Can be loved with great pleasure or with struggle and strife!

Yes—an OIL-PLATED engine is known for its "pepper."
You'll find that you're driving a "mighty high-stepper!"
Less acids, less carbon—less sludge due to wear,
When you start any trip you know you'll get there.

So, be kind to your car—show some affection,
Buy Conoco Nth for "extra protection!"

So, as a special reminder this Valentine's Day,
Prove to your car that you still feel "that way!"
See your Mileage Merchant and set up a date;
Treat your good friend to a thorough "OIL-PLATE."

Your Conoco Mileage Merchant

Power for Pulling

2-Wheel-Drive for the Highway

The Universal "Jeep's" wide speed range on hard roads saves valuable working time and its 4-wheel-drive pulling power for slippery roads and steep grades makes it the ideal farm tow-truck. It gives economical, satisfactory service, whether hauling hay to the next county or taking livestock to market. It's a handy pick-up, too—carries 1200 lbs.

4-Wheel-Drive for Field Work

For off-the-road service—in the field or over rough ground—the versatile "Jeep" has traction at every wheel and a choice of six forward speeds to give correct gear ratios for the work at hand. In 4-wheel-drive, the "Jeep" also works as a tractor . . . helps farmers the year 'round and is ready for virtually any hauling job.

War Shattered Families Reunited

Displaced Persons Bureau Swamped With Pleas To Trace Missing.

ROME. — A displaced persons tracing bureau, one of UNRRA's busiest agencies until UNRRA ended June 30, still is going strong under the preparatory commission of the international refugee organization (PCIRO).

Two years and more after the final defeat of the Nazis, PCIRO recently announced, inquiries for missing adults still are being received at the rate of 60 per month, while requests that it try to locate parents or relatives of unaccompanied children average one a week.

To date, PCIRO said, 2,642 cases of lost children and 16,893 missing adults have been handled. Of 11,658 cases dealt with in the year from September 1, 1946, to August 31, 1947, "positive results" were achieved in 1,257 and negative in 1,056. Still being investigated were 9,345 cases.

Romance and Pathos.
"Bare figures," the PCIRO announcement said, "can give no inkling of the romance and pathos stemming from thousands of family histories which come under the bureau's survey—the tragic aftermath of the war."

Inquiries, it said, come from all parts of Europe, and the bureau makes every effort to find the persons sought among the 32,000 DPs in PCIRO camps or the more than 150,000 others outside them.

Two case histories "taken at random from the files" were cited to show how the bureau works.

In one, Nicolaus Papavasiliou of Athens sought word of his daughter, Kiki, who had been studying music in Germany at outbreak of the war. She was known to have spent a short time in 1944 as an interpreter at a DP transit camp in Italy. After that she dropped out of sight.

The bureau discovered, finally, that in 1946 Kiki had lived for some months at an Allied military camp in Reggio Emilia, leaving it without permission. Italian police records showed nothing except that the girl apparently had not left Italy. An investigator reasoned that Kiki, who was 23, pretty and penniless, would not leave the DP camp unless she knew where her meals were coming from: Ergo, she was probably married.

Pair Reunited.
A search of marriage records was instituted, and Kiki finally was found living with her Spanish husband in Genoa—"well and happily married," she told the bureau in writing it for her father's address.

A more baffling case was that of Paul Buldinski, Latvia, who wrote from a DP camp in Linz, Austria, to ask the bureau to try to trace his wife, last heard of at Modena in 1945 after she fled from the Gestapo into Austria and Italy. He hoped soon to go to America, he said, and wanted to take her with him.

The woman was located quickly at the Reggio Emilia PCIRO camp, but thereafter the bureau's repeated letters to her went unanswered. Furthermore, letters to the husband brought no replies. The bureau was about to write off the case, assuming the woman had some reason for not wanting to see her husband again, when it got word that he had left the Linz camp without leave and was at Reggio Emilia with her.

Giant Telescope Mirror Set Up; Took 20 Years to Make

PASADENA, CALIF. — A 15-ton telescope mirror that has taken 20 years to make has been installed in an observatory to search farther into space than man ever has seen.

The \$600,000 mirror was added to the equipment of Mount Palomar observatory. With its mounting mechanism and packing, it weighed 40 tons and was carried on a 20-ton, 16-wheel trailer.

The precious surface of the glass, ground and polished for years until it is within two-millionths of an inch of perfection, was covered by plain paper.

Then there was a layer of aluminum foil to shield it from temperature changes.

Duke of Norfolk Finishes Last in Race With Burglar

LONDON.—The Duke of Norfolk, 39, Britain's ranking nobleman, finished out of the money in a footrace with a burglar. The robber fled with the duke's gold cigarette case and some of the duchess's jewels.

The duke surprised the intruder outside his bedroom. He chased him. Many of the castle's 70 servants joined the chase. Police from seven towns turned out to search the grounds. The robber, his shoes swathed in cloth to deaden noise, escaped into the fog.

Trap for Prowler Snares Watchman's Helper Instead

ST. JOSEPH, MO. — Policeman Austin Beierle answered a hurry-up call from a park watchman who reported he and his helper had trapped a prowler inside a tool house and had locked him in. When Beierle entered the building he found the "captured prowler" to be the watchman's helper. The prowler had escaped.

"Your girl is spoiled, isn't she?"
"No, it's just the perfume she's using."

Key members of President Truman's Cabinet are becoming increasingly annoyed by the influence exercised on White House policy by the President's "kitchen cabinet." The "kitchen cabinet" is inclined toward a policy line slightly to the left of center while the Cabinet steers somewhat to the right. As election approaches, Mr. Truman is less inclined to follow his Cabinet.

Averell Harriman, Secretary of Commerce, is being credited on the inside with generating the minor revolution that has shaken the Civil Aeronautics Board, the agency that regulates the aviation industry. Mr. Harriman, reputedly, wants to bring CAB into his Commerce Department, taking away its independent status.

Nuptial Plans Are Revealed

Mr. and Mrs. Joe Currie of this city are announcing the approaching marriage of their daughter, Norma Jo, to Howell J. Price of Dumas, son of Mr. and Mrs. G. E. Price, Brownfield.

The wedding is scheduled for February 14.

PRESBYTERIAN GUILD IS ENTERTAINED AT PROGRAM

Mrs. O. L. Coleman gave the devotional, "Gripped by a Purpose," when members of the Presbyterian Guild were entertained Tuesday afternoon in the home of Mrs. J. D. Barker.

Mrs. Lee Foster taught the lesson, which concerned Foreign Missions. A social hour followed.

Present were: Mrs. J. F. SoRelle, Mrs. L. H. Owens, Mrs. W. E. Miller, Mrs. W. C. Bowen, Mrs. R. A. Neblett, Mrs. Robert Jarrett, Mrs. Ray Cole, Mrs. W. L. Smith, Mrs. Coleman, Mrs. Foster and the hostess.

Help Keep Canyon Clean!

DEMONSTRATION CLUB MEETS FOR PROGRAM

Mrs. M. C. DeGraffenried was hostess to members of the Edgetown Home Demonstration Club, Jan. 23. Mrs. J. H. Wright presided at the meeting, and a song was sung by the group. Mrs. J. R. Sharp gave a financial report on marketing of the club.

After a brief business session, the program, "Danger at School," was given by Mrs. Waldrop. Mrs. Jessie Reid discussed, "Teach Our Children How to Live," and Mrs. H. E. Campfield told, "What Is Wrong With Our High Schools." Mrs. Sharp discussed, "What Good Is a College Degree?"

Refreshments of chicken salad, sandwiches, cookies and tea were served to the following members: Mrs. J. C. Dowd, Mrs. J. H. Wright, Mrs. Jessie Reid, Mrs. Cynthia Anderson, Mabel Solomon, Mrs. Waldrop, Mrs. Anthony, Mrs. G. H. Stratton, Mrs. Sparks, Mrs. Gill, Mrs. T. T. Fain, Mrs. E. C. Penick, Mrs. Dunn, Mrs. W. I. Wester, Mrs. Campfield, Mrs. M. E. Sogee, Mrs. J. R. Sharp, and three visitors, Mrs. Rice, Mrs. Walters, from the Cen-

tral Club, and Mrs. McDougal from Walla Walla, Wash., and the hostess.

EDITH BOYD MEMBERS MEET IN CHURCH PARLOR

Members of the Edith Boyd Circle of the First Baptist W. M. U. met in the church parlor Tuesday afternoon for a program under the direction of Mrs. Elwood Shero and Mrs. Jack Barnard.

Mrs. Barnard discussed, "Schools and Farms of China," and Mrs. Shero gave, "Communism in Spain." Attending were: Mrs. Lee McLaury, Mrs. Barnard, Mrs. Shero, Mrs. Carl Rogers, Mrs. M. K. Cox and Mrs. Marvin McBroom.

Recent visitors in the home of Mr. and Mrs. Bob Parsons and children were her parents, Mr. and Mrs. A. T. Smith of Wellington. They were enroute to Stratford.

Mr. and Mrs. Ira Brown of Dimmitt visited Sunday in Canyon with Mrs. B. C. Taylor and other relatives and friends.

Willard Childers of Slaton visited in Canyon Friday with his mother, Mrs. A. L. Watson.

MRS. J. W. KLEINSCHMIDT IS FRIDAY CLUB HOSTESS

Members of the Friday Afternoon Bridge Club were entertained in the home of Mrs. J. W. Kleinschmidt at three tables.

Refreshments of chicken salad, olives, white individual cakes, coffee and mints were served.

Guests were Mrs. D. A. Shirley, Mrs. Herschel Coffee and Mrs. L. N. Owens, and members: Mrs. J. D. Barker, Mrs. Ray Campbell, Mrs. Guy Harp, Mrs. T. H. Knighton, Mrs. Lee Foster, Mrs. Clyde Warwick, Mrs. R. A. Neblett, Mrs. Dan Sanders and Mrs. Bryan McDonald.

WORD OF DEATH RECEIVED

Mr. and Mrs. A. K. Goodman and family and nephew, Dewayne Brandt, were called to Colorado Tuesday night because of the death of Mrs. Goodman's father. They left to go to Colorado Wednesday morning.

Mr. and Mrs. Newton Harrell arrived in New Orleans, La., Wednesday after a tour of South America and the Canal Zone. They are expected to return to Canyon today.

Science Develops Deadly Torpedoes

Navy Lifts Secrecy From Experimental Project At Morris Dam.

AZUSA, CALIF.—A wartime secret, so well kept that even after two years of peace its function has been known only to scientists and navy men engaged in the actual operation, finally has been revealed to the public by the navy.

The secret involves a huge concrete and steel tube, 300 feet long and nearly two feet in diameter, which angles from the top of a bluff down almost to the surface of the waters impounded by Morris dam in the mountains north of Azusa.

Through this tube hurtle, with aircraft speed, torpedoes which may well become the prototypes of underwater missiles to be used in any future war.

From studying the behavior of these projectiles as they split the water at unbelievable speeds, scientists are evolving strange shaped missiles which are a far cry from the torpedoes of the last two wars. Down the other side of the bluff ranges an even more weird structure—a towering, 45 degree concrete ramp, even longer than the 300 foot tube. Rails on this ramp, still incomplete, will permit raising and lowering of the breech of a similar tube, so that torpedoes may be fired into the water at almost any angle.

Major Role in War. The "fixed angle" launching tube, which was built by California Institute of Technology under auspices of the office of scientific research and development, is credited with an important role in World War II. It launched its first "fish" in 1943.

"When we started the war," said Comdr. H. D. Hilton in an exclusive interview, the first the navy has permitted about its Morris dam underwater ordnance project, "we had much the same torpedoes with which we ended World War I."

"We had aircraft torpedoes which were insufficiently strong to withstand high speed aircraft drops and which often changed course on their way to the target for reasons which were then not understood."

"Toward the end of the war our torpedoes showed marked improvement. Not so frequently did a submarine or torpedo plane bore into deadly areas to launch a fish, only to see that fish fail to do its job."

"Improvements in ballistic design, made as a result of studies at the Morris dam torpedo range, have resulted in greatly increased accuracy. This, coupled with structural improvements as a result of operations of the fleet and other naval research activities, made our aircraft torpedoes the most effective of those of any nation."

Intricate Test Equipment. Cameras, underwater sound recorders and huge nets with foot wide mesh help the scientists observe the behavior of new torpedoes. Some of the cameras are under water, some are suspended from pulleys on ropes high overhead and some are housed in splash-proof buildings on the banks of the reservoir.

Sound recorders, submerged alongside the torpedo run, "listen" to noise makers incorporated in the "fish" and thus track the course. Four huge nets, one behind the other and 25 to 50 feet apart, provide an accurate check on the trajectory during the first 100 feet of the one mile run. Breaks in the net show depth and direction. A secret device clocks the missile's speed.

Some of the torpedoes are designed to bob to the surface when exhausted. Those which do not are recovered by navy divers. None of the torpedoes is ever a total loss because none carries explosives in these tests. The 200 foot deep reservoir, leased by the navy, still is used for its original irrigation and drinking water functions and also is held available as an emergency water source in case of drought.

Sweden Will Cut Imports

In Move to Save Currency STOCKHOLM, SWEDEN.—Informed sources said Sweden would make enormous cuts in imports from hard-currency countries, particularly the United States, in a drastic move to save foreign currency.

They said the quota of imports from such countries had been set at 300,500,000 crowns (about 105 million dollars) only about half that proposed by the government's industry commission last October.

New rationing of consumer's goods and manpower reductions in many industries were expected to result.

Navy Day Gift: 1905 Victory Ship Returned to Japanese

YOKOSUKA, JAPAN.—A famed old battleship was turned back to the Japanese—for use as an art museum and a dancehall—as the U. S. navy celebrated its third Navy Day in Japan.

The battleship was the 15,000-ton Mikasa, flagship of Adm. Heihachiro Togo, who defeated the Russians in the Battle of Tsushima Strait in 1905. The Japanese had imbedded the ship in concrete in Yokosuka harbor and venerated it as a military shrine.

In betting on the sweepstakes, there's more accent on the weep than the take.

GROUP OF FRIENDS IS ENTERTAINED AT BRIDGE

Bridge at four tables was the diversion for the afternoon when Mrs. Arthur C. Haley, Jr., was hostess to a group of her friends Tuesday in the home of her mother, Mrs. Clyde Warwick.

Room and table decorations were in keeping with the Valentine theme. High score went to Mrs. Elsworth Barnard, with Mrs. Jack Taylor winning low. Mrs. Ed Bagot was awarded the traveling prize.

Refreshments of Valentine cakes, sandwiches, salad, mints and coffee were served by the hostess.

Guests were: Mrs. W. J. Wooten, Jr., Mrs. Chris Wooten, Mrs. Meredith Warren, Mrs. Jim Tout, Mrs. Oscar Hinger, Mrs. Bill Sternberg, Mrs. Bob Bellah, Mrs. Robert Davis, Mrs. Robert Orton, Mrs. Jack Walker, Mrs. Tommy Lair, Mrs. Barnard, Mrs. Taylor, and Mrs. Bagot, Mrs. Quintin Lewis and Mrs. Betty Jean Zinlach of Amarillo.

Yes, I was barred at the door of the Metropolitan Opera Club the other night because I wasn't wearing tails. The door man was wearing a full dress suit. However, don't worry about me. I have been barred before from other places because I wasn't wearing tails.—Ex-Gov. Alfred M. Landon (Kansas), 1936 GOP Presidential nominee.

In 2100 A. D., our descendants will be morons. They will be the stupidest great-great-grandchildren of the stupidest grandchildren of the stupidest children of the stupidest parents now living.—Dr. Walter Pitkin, author of "Life Begins at Forty."

"Hmmm," said the tourist, "looks like we might have some rain." "Could be," drawled the Kansan. "I shore hope so. Not for myself, but for the kids here. I've seen it rain."

W. S. C. S. CONCLUDES STUDY OF BIBLE PRAYERS

Mrs. B. E. Bollman was guest speaker when members of the Women's Society of Christian Service of the Methodist Church met Tuesday afternoon in the home of Mrs. Dan Sanders to conclude their study of "Great Prayers of the Bible."

At the social hour the hostess served sandwiches, cookies and spiced tea to the twenty-two members present. The plates were decorated with the Valentine motif.

On Feb. 10, the Society will go to Vega where they will attend the District Zone Meeting at the Methodist Church in that city.

Mr. and Mrs. Bill Howse visited in Canyon for several days the past week with her grandmothers, Mrs. E. D. Harrell and Mrs. N. A. Croson. Mr. Howse has completed his college work at Tucson, Ariz., and he and his wife left Wednesday morning to go to Wichita, Kans., where they will make their home.

Bob Burns just tattled on the mountaineer who complained his son wasn't being taught correctly in school. "They're learnin' him," the indignant hillbilly snorted, "to spell 'taters' with a P!"

Randall County Library Board Elects Officers

Mrs. George Clark was elected to head the Randall County library board at a meeting of the group held Tuesday morning in the library. Outgoing president is Mrs. S. B. Lousder.

New members of the board include Mrs. Virgil Henson, Mrs. J. R. Ballard and Mrs. W. T. Oliver. Retiring members are Mrs. I. F. So-Relle and Mrs. E. R. Cleavinger. Remaining are Mrs. Burney Slack, Mrs. Chris Wooten, Mrs. Walter Graham and T. C. Thompson. Mrs. Cecil Briggs is librarian.

Mayor W. A. Warren met with the board for its annual meeting.

The annual report presented to the board revealed that 107 cards were issued to new city readers in 1947, and 37 new cards went to rural readers. There were 124 deposit cards for the year with a total circulation of 13,458 books to readers.

New books purchased totaled 230, with books donated numbering 82. Only seven books were lost or worn out in 1947, and the total number of books on the library shelves at the present date is 8,729. One hundred ten books are to be found on the Boy Scout shelf.

New books for the month include: Stone Soup, Marcia Brown; The Golden Flash, May McNew; Martha, Daughter of Virginia, Marguerite Vance; A Horse to Remember, Genevieve Eames; Murder in the Blackout, J. Russell Warren, and Eagle in the Sky, Fran Wych Mason.

Clark Jarnagin Shows Pictures For Lions Club

At the regular Lions Club luncheon last Thursday an interesting film was shown by Coach Clark Jarnagin, of the athletic department. The pictures were in brilliant colors, and included homecoming scenes and campus views taken by Dr. and Mrs. Noble Armstrong, and a special film of the final football game of the season played between the University of New Mexico Lobos and the Buffaloes of West Texas last November. The latter film was taken by staff photographers.

Coach Jarnagin gave very illuminating comments on the technical phases of the game, returning several of the plays on the screen to illustrate his points involved in the particular plays. It revealed the splendid team work of the hustling Buffs, and showed several star plays of individuals to very good advantage. The team gives great promise of still finer precision and perfection of drill for next season.

Mr. and Mrs. Lee Roark and Mr. and Mrs. Jess Deger of Wellington spent the week end visiting here in the home of Mr. and Mrs. Velton Sogree.

Mr. and Mrs. W. C. Black returned Saturday from Dallas where Mrs. Black underwent two operations during the past two weeks. She is reported to be doing very nicely.

County Agent and Mrs. H. E. Shahan and little daughter visited with relatives in Lipscomb during the week end.

Mr. and Mrs. Bert Northcutt of Logan, N. M., spent the week end visiting in Canyon with Mrs. J. L. Newman and son.

Mr. and Mrs. S. F. Dove of Amarillo were recent visitors in the home of Mr. and Mrs. A. B. Russell of this city.

Recent visitors in the home of Mr. and Mrs. W. E. Roberts were Mr. and Mrs. B. H. Roberts of Galveston and Bill Roberts of Booker.

Mr. and Mrs. K. A. Cox and son, Kenneth, of Lubbock visited with friends in Canyon recently. They are former residents of this city.

Mr. and Mrs. Chester Ford and sons of Amarillo were in Canyon Sunday to visit in the home of her parents, Mr. and Mrs. E. C. Penick.

Mrs. J. P. Winner of Waco was a recent visitor in Canyon with her mother, Mrs. Bill Martin and family.

Elva Stewart of Lubbock visited in Canyon recently as the guest of Mr. and Mrs. Paul Rogers.

J. L. Newman is employed in Los Angeles, Calif., and expects to be in that city for some time.

**New Shipment
Air Mail Nylons
City Drug**

A sign posted in a store in Western Minnesota came to attention of William J. Murphy of Malden, Mass., who collects these items. It reads: "Skunk Hunters Please KEEP OUT. Knock on the door and you'll be served outside."

The Justice Department will launch suits against AFL and CIO unions next week for violating the Taft-Hartley Act provisions restricting political activities. To speed its test case, the department will seek criminal indictments against at least one of the alleged violators.

If little Red Riding Hood lived today. The modern girl would scorn her! She had to meet only one wolf—

Russian War Is Called Inevitable By Rotary Speakers

Dr. and Mrs. Charles Eaves of Lubbock spoke Tuesday at the Rotary Club luncheon on their experiences in Japan and Germany. They were introduced by Dr. R. A. Neblett.

Dr. Eaves spent a year in Japan in charge of educational institutions in Tokyo, but visited all parts of the nation. He found Japan a cultural nation, composed of small farms of 2½ acres intensely cultivated. Before the war it was highly industrialized. American bombers had flattened most of the industrial plants. The Japanese are very co-operative with the Americans, but hate the Russians. 15 million copies of the "Life of McArthur" have been sold in Japan.

General McArthur has done a wonderful job, but feels now that the army should withdraw and let the States Department take over. The Japs are strong for McArthur, and the speaker predicted that when war with Russia comes 10 million Japanese will enlist with the Americans if they can be equipped and supplied. The atomic bombs made friends of the Japs.

Mrs. Eaves described the trial of war criminals in Germany, where she was in charge of instruction.

The Germans hate Americans, but fear the Russians more. Army officers feel that our troops should get out of Germany as soon as possible and prepare for the coming war with Russia.

Mrs. Eaves said that Americans did not know everything that was going on in Germany. Our military men are forced to take orders from the Russians. Russia has such a large force that she could march to the English Channel in 30 days with little opposition.

American teachers are doing a good job with the youth who have had little opportunity for study in 10 to 14 years; but they go home to their parts, who still believe in the Nazi doctrine and we lose all the benefits.

Communism is in every nation of Europe.

Mrs. Eaves states that our military men are of the opinion that the only way to check Russia is to establish a circle of air bases around Russia; have plenty of B-29s loaded with atomic bombs ready to blast the vital industries of Russia if she dares to move.

Mrs. Eaves believes that in case of war America should move to save England, Spain, Italy and North Africa from Russia.

John S. Humphreys introduced Silas Hart as a new member; and Stuart Condron introduced Jack Taylor as a new member.

Visitors were: Arch Hunsley, Arthur Osgood, H. W. Richards, Johnnie Johnson, all of Amarillo; Tom Elzy of Perryton; Miss Nolabella Welch and Dan Fitzhugh of Canyon.

Vet Administrator Makes Report of Last Year's Work

Rhea Smith, County Service Officer, has reported the following items of business transacted by him in Randall county for veterans:

Pensions approved during 1947, \$11,357.
Widows and parents pensions \$2,820.
Insurance claims paid, \$1,800.
School and on the job training, \$12,500.
Insurance reinstated, \$145,000.
Mr. Smith maintains his office in Amarillo but visits Canyon weekly.

When Congress destroyed price control, they made it certain a day of reckoning would come. The American people gave up their birthright of a stable price structure for a mess of pottage in the form of freedom from the petty irritations and annoyances of price control.—Harry W. Schacter, president, Kaufman Straus Department Store, Louisville.

Russian agents are reported in advance to the White House to be playing an important role in the Palestine disturbances. At the same time, Czechoslovakia, under Russia domination, is doing a big business in the sale of arms from its Skoda Works to the Arabs.

Three ways to avoid embarrassment when you fall on the dance floor: (1) Just lie there; they'll think you fainted. (2) Get up gracefully. (3) Start mopping the floor with your handkerchief; they'll think you work there.

Hard feelings are developing between Senator Robert Taft of Ohio, and Senator Vandenberg over foreign policy. The growing differences between these two party leaders can have a big effect on the outcome of the battle for the Republican nomination. Mr. Taft is tending to be more friendly to Joseph Martin, House speaker.

Mrs. J. E. Culwell visited with friends in Amarillo Sunday.

Inflation Pinches
Most of EuropeGovernments Fail to Halt
Rising Prices Through
Strict Control.

WASHINGTON.—In the markets where it takes a lot more money than most people have to buy the things they need, the drachma of Greece, the zloty of Finland, the franc, the pound and all the currencies of Europe today are only shadows of their former selves.

Inflationary pressures are pinching almost all of the continent. In most countries the governments have been fighting a losing battle against rising prices despite efforts at strict control.

With a few notable exceptions, newspaper correspondents throughout Europe report the same situation: Too much money chasing too few goods—and mostly it is a case of too few goods, a legacy of years of wealth-destroying war.

Russia, using a device already employed in Hungary, France, Italy, Austria and other countries, resorted to the drastic measure of revaluing the currency by requiring all rubles in cash to be turned in at a rate of 10 old rubles for one of the new. The result has been a drastic curtailment of money in circulation. There was a somewhat less drastic curtailment of bank accounts and outstanding bonds.

Russia Takes Action.

By simultaneously decreeing a broad reduction in prices and by maintaining the same wages as before in her controlled economy, Russia effected an almost immediate drop in food and many other prices.

Drastic wrenchings of postwar economies also were reported from other countries in the Soviet sphere.

Romania decreed heavy taxation to reduce the amount of money in circulation and bring it nearer the realistic level of industrial and agricultural production. Living costs, although still high, plunged sharply.

Czechoslovakia, plagued by extreme food and clothing shortages, levied heavy new taxes to halt inflationary buying and help pay the mounting national debt—up nearly \$2,500,000 in a year.

Italy's budget czar, Luigi Einaudi, was probably the only government financier in all Europe worrying about deflation.

Got Quick Action.

Einaudi's rigid credit restrictions to curb speculation and his devaluation of the lire to the black market rate, have at least temporarily brought swollen security prices down, stabilized the currency and lowered the cost of living.

Deflation rather than inflation also was the order of the day in occupied Austria.

In Britain even the cost of postage went up because, the government explained, operating expenses have increased. Despite government controls, coal, transportation and milk prices were edging higher. Purchase taxes, already steep, have been increased sharply to drain off some excess purchasing power.

Defeated Germany was experiencing the greatest success in holding the line in legal markets (black market prices are 50 to 100 times higher).

Crown Prince Leaves in Huff
Over Quarantine Regulations

BEIRUT, LEBANON. — Crown Prince Talal of Trans-Jordan left Lebanon in a huff when border authorities told him his royal blood did not exempt him from quarantine regulations.

A three-day quarantine was imposed in an effort to keep the Middle East cholera epidemic from invading Lebanon. The epidemic cropped up in Syria after taking thousands of lives in Egypt.

Prince Talal, heir to King Abdullah's throne, had passed through the cholera-infested area and had planned to spend two weeks here. He had an inoculation certificate, but border officials said he still would have to spend three days at the frontier.

Talal called the affair a "humiliation" and recrossed the border into Syria.

United States Offices Study

Change to Coal for Heating

WASHINGTON. — Federal works agency said that 20 government agencies will make a survey to determine feasibility of converting government buildings from oil to coal heat in view of the oil shortage.

Representatives of the agencies discussed the possibility of conversion with Federal Works Administrator Philip B. Fleming.

It was pointed out that the government consumes 5 per cent of the fuel oil used by the nation annually. The military takes most of the government supply.

Reds Act to Halt Business

Moving Into American Zone

BERLIN. — Saxony has clamped down on a movement among some German manufacturers in that Russian-occupied state to transfer their businesses to the American and British occupation zones, the British-licensed German press service said.

A directive was issued against the movement and heavy penalties were ordered.

Hobby of the Month Club is the latest of its kind. Will someone next propose a Hubby of the Month Club?

Market Week To
Be Observed at
Amarillo Feb. 22-24

Hundreds of apparel merchants from the four state area will troop to Amarillo for the Panhandle's first semi-annual Market Week, February 22 through 24.

More than 100 manufacturers' representatives, showing about 250 different lines, already have registered for the three-day show.

The Herring Hotel is show headquarters. The top five floors and the mezzanine have been reserved; and the Market Week committee now is negotiating with hotel officials for another entire floor.

"Reservations are coming in every day," Mason King, chairman of the committee, said.

Mr. King pointed out that top national and regional lines in shoes, dry goods, men's and boys' wear, ladies' coats and suits, dresses and sportswear, children's and infants' wear will be shown.

Cecil White is secretary of Market Week. His offices are at the Amarillo Chamber of Commerce. He will provide information about the three-day show.

Serving on the Market Week committee with Mr. King are Leo Wilmet of the Shamrock Oil & Gas Co.; W. H. Gattis of the Kenyon & Gattis Shoe Store, and Arthur Truitt, Buick dealer.

Mr. King said the market would become a Panhandle institution.

"To furnish a nearby market to merchants in the territory is a function of Amarillo as a trade center," he said.

Republican party organizers are gravely concerned over Minnesota Sen. Joe Ball's chances for re-election in November. Recent public opinion polls in the state show that only two out of every ten voters want to put Ball, who worked like a Trojan on national issues, spent little time on fence-building, back in the Senate.

Minimum wage levels are almost certain to be boosted during this session of Congress. Because this is an election year and because 40c an hour is admittedly too little, Congress will probably agree on a figure close to 65c; but Truman's request

for 75c an hour will never see the light of day.

Paris in the last few weeks includes blackouts at night, everyone speaking of civil war, dining by candlelight, tension everywhere, but certainly now, for the first time, one has the feeling that every Frenchman is pretty fed up with communism.—Cynda Glenn in Variety.

The 40-hour week is inflationary. It is a heritage of the days of planned scarcity, of plowing under cotton and killing pigs to raise prices. Essentially, it is a job-raising measure.—Charles E. Wilson, president, General Motors Corp.

HOSEA FOSTER

Complete Insurance Coverage

WHY

GENERAL ELECTRIC
PUT LOWERED PRICES
AHEAD OF OTHER THINGS

General Electric lowered prices because we wanted to do our part to stop the present spiral of inflation.

General Electric lowered prices on electrical appliances in greatest demand—because that is where lowered prices on General Electric products will do the most good and have the greatest effect.

General Electric lowered prices regardless of the fact that G-E profits are not high—are not at present levels high enough.

We did this because we know that in the long run General Electric can prosper only as the people of this country prosper. We believe that producing more goods for more people at less cost is the soundest way of running a business. And we feel that inflation in this country has reached a dangerous level—for the wage earner, for the man with savings, and for industry alike.

Do you know what inflation can do to you?

As money buys less and less, your savings lose their buying power. Life insurance policies dwindle in value. Money saved to take your wife to the hospital won't pay the bill when the time comes. Pay checks buy less and less. Retirement money won't pay for retirement.

This applies to the man who brings home a weekly pay check, to the man with a little savings in the bank or a life insurance policy, and to companies that have to build new plants and buy new machines to fill future needs and provide future jobs.

Inflation is a sinister thing. It steals up on a country and its economy in a gradually accelerating two-step of prices and wages—each trying to get one step ahead of the other—and there is no red line to show when the danger point has been reached.

Inflation is like a fire. Once it gets well under way, it can never be checked until everything is destroyed.

Self-restraint by industries and individuals
the best check

You as an individual can do most by buying less and saving more—thus avoiding bidding up the prices for scarce goods. Business and industry can do much by lowering prices whenever and wherever possible—voluntarily.

General Electric put lowered prices ahead of other things because we believe it is a step towards liking inflation.

We Must Destroy Inflation or It Will Destroy Us

GENERAL ELECTRIC

Governor Jester Reports To People On Administration

Governor Beauford H. Jester reviewed the activity of the State government of Texas during the past year on the first anniversary of his inauguration as Governor.

Expressing appreciation to the members of the Texas Legislature, the heads of State agencies, and the people of Texas, for the cooperation given, the Governor mentioned as highlights of the year's progress the following:

The doubling of appropriations for eleemosynary institutions; the opening of two new tubercular hospitals; a new school and home for feeble-minded children and senile women; and an institution for delinquent colored girls.

The creation of a Commission to study the State's juvenile training program and make recommendations on means of coping with the problem of juvenile delinquency.

Increasing appropriations for the Prison System, providing for new cell blocks, and for new managerial systems.

The detailed checking of all clemency application with local law enforcement officers and the tightening of restrictions on the restoration of driver's licenses for persons convicted of driving while intoxicated.

The efforts to promote highway safety through the adoption of the uniform traffic code, the addition of 200 Highway patrolmen, and the calling of a highway traffic action program for the coming spring.

The insistence upon strict enforcement of laws of the State.

The development of a comprehensive disaster relief plan and of a state fire prevention program.

The reorganization of the Texas National Guard and creation of the Texas State Guard Reserve Corps.

Road contract awards amounting to 70 million dollars, the largest in the State's history, with present plans for bringing farm-to-market road mileage in the State to the 7,500 figure.

Increasing all appropriations for public health with a resultant decrease to an all-time low of death rates in Texas for typhoid fever.

diarrhea, dysentery, scarlet fever, diphtheria, measles, polomyelitis, tuberculosis, malaria, syphilis, and typhus fever;

Surveying the State's needs for hospital facilities and, with Federal aid, providing 800 new hospital beds in rural areas in Texas;

Bringing old age assistance, help for the needy blind and for dependent children to the 35 million dollar limit allowed by the Constitution; the increasing of all grants; and the addition of almost 16,000 people to the rolls;

Provision for the largest appropriations for public school education and teachers salaries in the history of Texas and for a commission to study ways and means of making further progress in this field;

Efforts to protect the public schools billion dollar interest in the tidelands;

Taking steps to combat the threat of foot and mouth disease; the encouragement of conservation of water resources; soil conservation; and promotion generally of the interests of farming and livestock raising; the organization of the Veterans Affairs Commission; and permanent organization of the Good Neighbor Commission; and an approach to the problem of redistricting the State.

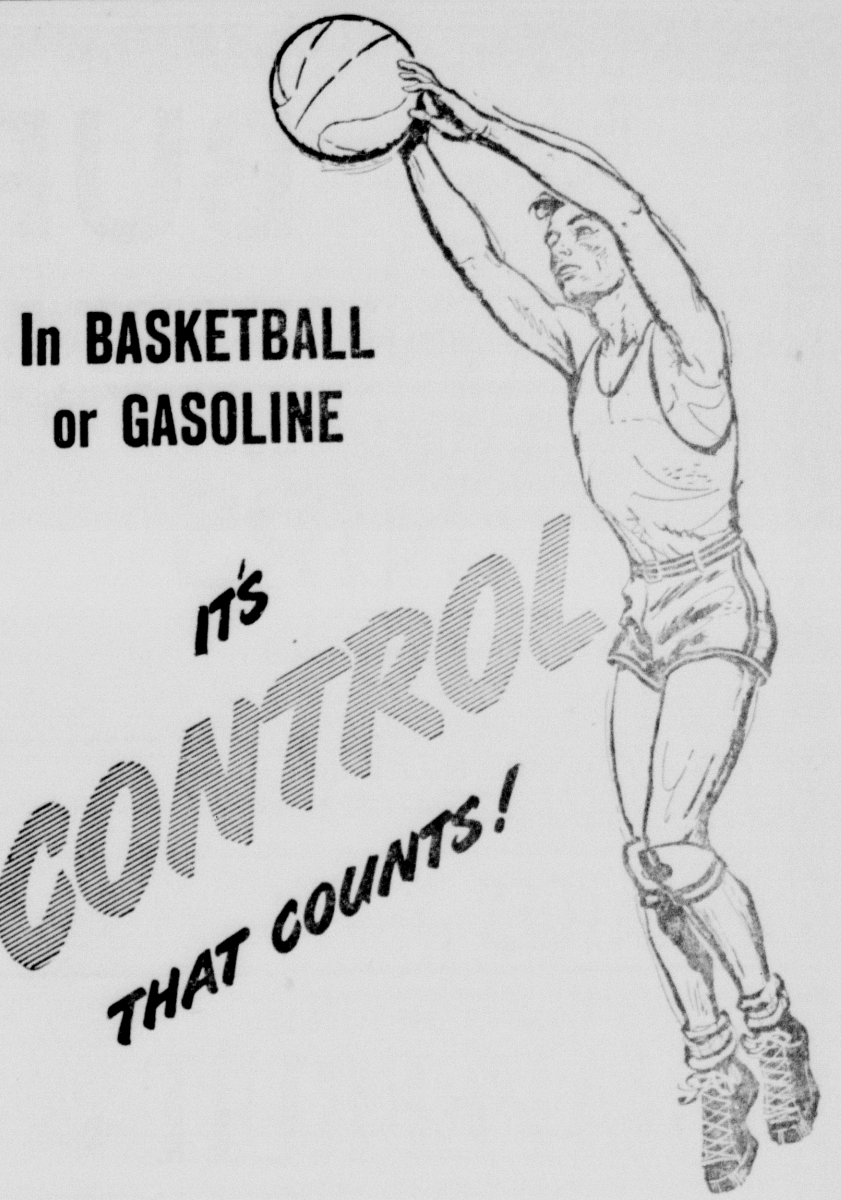

Senator Robert Taft and Arthur Vandenberg, Republican leaders, are tending to move further apart on the issue of foreign policy. In a showdown, Senator Vandenberg is expected to go along with State Secretary Marshall and a full-sized Marshall Plan rather than with Senator Taft, who prefers to make an issue of foreign policy in the coming political campaign.

Open Forum Group Meets Next Sunday

DR. NOBLE ARMSTRONG
... new sponsor

Semester exams and the holiday recess following have played interference with interests and attendance at the Open Forum meetings which were originally scheduled in January for a Sunday afternoon campus feature.

Dr. Noble Armstrong, leader, an-

nounces the forum program will be resumed on Sunday afternoon, February 8 at 4 o'clock in the parlor at Cousins Hall. "The Elements of Moral" will be the topic presented for discussion.

The purpose of the forum is to give opportunity for free discussion on topics of common interest, wide appeal and of practical value, especially for the campus. Students and faculty members are urged to participate in the meetings.

Highland News

About six to eight inches of snow was received in this vicinity last week. And it was just as cold here as elsewhere.

W. E. O'Neal fell a few days ago in his home and broke his shoulder. He is at Northwest Texas Hospital.

Old timers of the Wildorado community were shocked to hear of the death of Mrs. Carrol Moreland of Amarillo last Friday. Lucille Goodman Moreland spent her girlhood and early married life in Wildorado.

Mr. and Mrs. W. Guthrie spent Friday evening at the Carl Fuqua home.

Mr. and Mrs. Bob Fulton visited in the Howard Fuqua home Thursday evening.

Mr. and Mrs. Clay Fuqua, Mr. and Mrs. Howard Fuqua and Rhenda and Mr. and Mrs. Carl Fuqua

Ticklers

By George

"But I assure you, I had it on when I came in here—I intend to go to a party later."

were dinner guests in the Jack Cage home last Monday evening. Jack Baker of Hot Springs, N. M. spent last Monday night at the Jack Cage home.

Mr. and Mrs. Clay Fuqua spent several days at the Carl Fuqua and Jack Cage homes last week before returning to their ranch in New Mexico last Friday.

Mrs. Jack Cage and Mrs. Howard Fuqua attended a luncheon at the L. D. Jones home in Amarillo last Friday.

Mr. and Mrs. Leroy Rae of Bushland are the proud parents of a daughter born last week.

Mrs. Elmer Mason will entertain the club at the Highland School Tuesday of this week.

We are glad our roads have been passable this bad weather.

President Truman, in private, is beginning to be worried about the political effect that Henry Wallace can have in 1948. The early signs point to the probability that Mr. Wallace may draw as much as 10 per cent of the vote in some key States, largely from the Democratic party.

A quartet is where all four think the other three can't sing.

New Deal economists, who once were the advocates of pump priming, profess to be shocked by the size of the \$40,000,000,000 budget that Mr. Truman is recommending. They express an opinion that at least \$5,000,000,000 should be cut from that budget in a boom period such as the present.

This country is about ready to call it quits in the effort to reach an agreement with Russia on control of the atomic bomb. U. S. has gone as far as it is willing to go to make concessions for control of the bomb and Russia seems adamant in refusing to agree to terms that U. S. would exact, so the whole deal is off.

I belong to the intellectual opium-eaters of the pre-war era. This new generation has no time to dream about the classic past; it knows a lot of things that we don't. But post-war people admire a steak more than a Rembrandt.—H. E. Nasrollah Entezam, Iranian delegate to the United Nations.

"My husband's face dropped a mile when we first visited Grand Canyon."
"Disappointed?"
"No, he fell over the rim."

There is the story of the two bees in a single hive who fell madly in love with the same queen. One was a husky, bellicose bee, the other a spindly weakling. The latter, recognizing his disadvantage, began guzzling vitamin pills and doing setting-up exercises at a furious clip. Finally, he challenged the big bruiser to mortal combat. The winner? Vitamin bee!

Governor Mon C. Wallgren of Washington, is entering strongly at the moment in President Truman's calculations for a running mate in the coming campaign. Mr. Truman wants someone either from the Far West or the East Coast. Senator Millard Tydings of Maryland, is still in the running.

To jack up lagging enlistments, the Army is revamping its pay schedules for enlisted men. Recruiting officers have reported that semi-specialized jobs like truck drivers and engineering machine operators will never be filled until Army pay scales more nearly match civilian rates.

Mrs. Ernest Sykes Is Named Honoree At Bridal Shower

The home of Mrs. Fred Standley was the scene Saturday, Jan. 24, from 3 to 5 p. m., for a post-nuptial bridal shower honoring Mrs. Ernest Sykes, the former Miss Beulah Eugenia Hammond. Co-hostesses with Mrs. Standley were Mrs. Walter Graham, Mrs. J. I. Payton, Mrs. T. H. Knighton, Mrs. J. C. Dowd, and Mrs. Virgil Henson.

The bride's chosen colors, yellow and white, were used in the table decorations, and Mrs. Knighton and Mrs. George Blackwell presided at the refreshment hour.

Mrs. B. B. Warren, sister of the honoree, secured names for the bride's book.

Piano selections were played throughout the afternoon by Virginia and Ann Holt.

Attending or sending gifts were Mesdames A. B. Holt, Earl J. Davis, J. D. Barker, A. K. Goodman, E. D. Harrell, H. C. Adcock, H. A.

Sykes, Lonnie Byars, J. T. Sykes, Jr., Alma Fuller, R. A. Neblett, George L. Blackwell, John H. Wright, Burney Slack, Lorenzo Wirt, W. I. Wester, B. B. Warren, E. B. Anthony, J. T. Sykes, Sr., John L. Hammond, Virgil Henson, Graham, Knighton, Payton, Dowd, and Standley, and Misses Nancy Adcock, Winette Sykes, Sue Ann Colwell, Frances Standley, Kay Fuller, Virginia and Ann Holt.

Mesdames W. T. Davis, S. L. Terry, W. J. Wooten, Jr., Frank Wright, Lee Johnson, W. H. Hardin, Joe Baber, John Davis, Roy L. Johnson, T. S. Maxwell, R. B. Gist, Conway Kuykendall, Jessie Reid, Tom Moore, Charles Conatser, Grady Persons, Glenn Dowlen, Glenn Persons, Guy B. Tabor, Edna McCaslin, Barlow, W. T. Oliver, C. L. Thompson, Jay Prichard, J. D. Key, Mary Burtz, Stella Murrell, G. B. Heath, Boyd Moore, Hubert Waldrop, T. W. Henderson, G. M. Stuart, Henry Ratjen, R. T. Bowman, W. A. Warren, O. A. Smith, Elmer Marshall, Milton Sanders, Clarence Stallings, T. T. Fain, Potter, T. C. Gooch.

Mrs. Ruth Hill, Jean and Mary; Mrs. Ed. A. Fuller, Mangum, Okla.; Mrs. Molly Williams, Missouri; and Miss Ruth Lowes, Dr. Ima Barlow, Miss Eula Potter, Jimmy, Joe and Patsy Sykes.

DEAN MITCHELL JONES IS SUE HITE GUEST SPEAKER

Mrs. Herschel Coffee, program chairman of the Sue Hite Club, introduced Mitchell Jones, Dean of Men at West Texas State College, to the club as guest speaker at the Monday afternoon meeting, Jan. 26.

Dean Jones discussed the topic, "Mental Hygiene," giving an exceptionally interesting resume of mental hygiene and psychology. This subject is one required by the board of Texas Federation of Women's Clubs.

Mrs. Loyd Devin presented an interesting summary of outstanding news that has been published in the last three issues of the Women's Federated Club magazine.

Monday, February 9, at 3:30 p. m., the club will have as speaker, Mrs. W. E. Miller, who will review the book, "The Tree of Liberty," by Elizabeth Page. This will be the first of a series of topics outlining the current study, "The New Nation."

Members present were: Mrs. W. E. Miller, Mrs. A. G. Kieselbach, Mrs. Ben P. Simon, Mrs. Sidney Burgess, Mrs. W. A. Moore, Mrs. Truett McGregor, Mrs. Donald B. Gragg, Mrs. Aubrey Crossland, Mrs. Borden Price, Mrs. Jerry Newman, Mrs. Loyd Devin, Mrs. E. R. Cleavinger, Mrs. Herschel Coffee, Mrs. Charles Duval, and Miss Eula Potter.

MRS. P. H. BABER IS WEST SIDE CLUB HOSTESS

"How We Can Help Our School," was the subject of the program for the West Side Home Demonstration Club in the home of Mrs. P. H. Baber on January 21.

At the conclusion of the business meeting, Mrs. Ed Bourn read an article on, "Teaching Our Children How to Live." Mrs. Jim Carter gave an interesting discussion on, "What Is Wrong With Our High Schools," and Mrs. B. A. Burrus closed the program with, "What Good Is A College Degree?"

Orders were taken for glove leather, and the club adjourned to meet in the home of Mrs. Louis Tuck, Feb. 4.

Refreshments were served to the following visitors and members: Mrs. Olin Huff and daughters; Mrs. G. B. Heath, Mrs. John Bryan, Mrs. B. A. Burrus, Mrs. W. L. Avent, Mrs. Ed Bourn, Mrs. Louis Tuck, Mrs. Ray Metcalf, Mrs. J. B. Hager, Mrs. Jim Carter, Mrs. J. D. Pruitt, Mrs. J. J. Wright and Mrs. Baber.

Fairview Breezes

We had a nice crowd out for Sunday school Sunday morning and B. T. U. Sunday evening.

We enjoyed singing Sunday evening after B. T. U. service. These singings are led by G. E. Wesley and are enjoyed every first and third Sunday evening. If you enjoy singing, come and join us as we use the new Stamps-Baxter books and everyone is welcome.

The "42" tournament Saturday evening was attended by a large crowd. Eight tables of Progressive "42" were played and soda pop and homemade cookies were served by the hostesses, Mrs. Harney Rogers, Mrs. John Patterson, Mrs. Curley Myers and Mrs. J. S. Wesley. Come again Saturday evening. Hostesses for the next tournament will be Mrs. Frank Rogers, Mrs. E. M. Wilson, Mrs. A. E. Wise and Mrs. S. F. Sharpes. All are welcome.

Mrs. Tucker and Woodrow had the misfortune of losing their house by a fire. Woodrow had gone to Sunday school, and Mrs. Tucker was alone and lighted a kerosene cookstove, and it exploded. Mrs. Tucker would have burned but for a neighbor passing at the time and getting her out of the house. Foye Monty was enroute to Happy when he saw the smoke and came to her rescue. She escaped with minor burns.

Mrs. J. W. Wesley is having a quilting in her home for Mrs. Tucker Wednesday, sponsored by the demonstration club. Two quilts have been donated by the women and will be quilted Wednesday.

Mrs. G. E. Wesley will be brought from the hospital Wednesday or Thursday. She has been in St. Anthony's for a sinus infection.

Mrs. J. W. Wesley was in the hospital in Canyon the past week for and infection. She is at home and doing all right.

Giesecke-Bagley Vows Exchanged In Home Rites

In a ceremony performed Sunday, January 25, at 2:30 p. m. in the home of the bride's parents, Miss Sylvia Charlene Giesecke, daughter of Mr. and Mrs. C. W. Giesecke of Matador, and Mr. Wayne Bagley, son of Mr. and Mrs. W. K. Bagley of Canyon, were united in marriage.

The vows were exchanged before Rev. Oscar Bruce, pastor of Matador Methodist Church, in the presence of relatives and a few close friends of the couple.

A window framed the bridal party, with wrought iron candelabra on either side, and a floor basket of white gladioli and greenery decorating the scene.

Mrs. G. P. Hamilton, organist, played "Because" while Miss Jean Covington of Dougherty and Miss Betty Boteler of Floydada, college classmates of the bride, lighted the candles. Miss Joyce Bagley, sister of the bridegroom sang "I Love You Truly." The traditional wedding marches were played, and during the ceremony, Mrs. Hamilton played, "With This Ring."

The bride, given in marriage by

her father, wore a dress of navy blue crepe crepe with gray accessories, and a white orchid corsage. She carried a white Bible, topped with a bouquet of white carnations. For something old she wore ear screws which were a gift from her father to her mother. Something new was her wedding dress, something blue was a blue ribbon, and a strand of pearls belonging to Miss Edna Farmer of Wheeler, was something borrowed.

Miss Erjuana Lambert of Kamay, Texas, cousin of the bride, was maid of honor. She wore a dress of aqua crepe and a corsage of white carnations. Gene Lowman of Canyon, attended the groom as best man.

Following the ceremony, a reception was held, with Miss Lambert serving the three tiered cake, topped with a miniature bridal couple, and Misses Covington and Boteler presiding at the punch bowl. The table was laid with a lace cloth and centered with an arrangement of white carnations, with white candles in crystal holders at each end.

In addition to the bridal party and members of the family, other members of the family, other guests present were Miss Bessie L. Medlen of Roaring Springs, an aunt of the groom; Leroy Wooten, Miss Juanita Bell and the groom's brother, Robert Bagley, all of Canyon, the bride's brother, L. C. Giesecke, Texas Tech student, Lubbock, and Judge G. E. Hamilton of Matador.

Mrs. Bagley is a graduate of Roaring Springs High School, and received her degree last semester from West Texas State College, Canyon, where she majored in business administration and was an outstanding figure in campus activities. She is a member of Alpha Chi, and was listed in "Who's Who" among students in American Universities and Colleges for 1946-47, and also 1947-48. She was a member of the wo-

Drivers Given Instruction As To Careful Driving

What is your T. L. Q.? Your traffic law quotient, that is. Do you know the laws that help protect you from an automobile accident?

To familiarize the public with traffic laws and the necessity for obeying them, The Texas Department of Public Safety is cooperating in a nationwide "Learn and Obey Traffic Laws" program during February.

"In almost every accident, one or more drivers were violating some traffic law," said Colonel Homer Garrison, Jr., Director. "Better voluntary observance of traffic laws would save lots of lives."

One of the most common causes of accident is driving in the wrong lane, according to W. J. Elliott, Chief of the Texas Highway Patrol Division. He pointed out that National Safety Council statistics show driving on the wrong side of the road to be the second most frequent violation reported in traffic mishaps.

Keep right and you'll be left—to drive another day, he said, and listed these rules:

1. Drive to the right of the centerline. On three-lane roads, never drive in the far left lane, and on four lane roads, never drive to the left of the center.

2. Drive to the left on a two-lane road, in the center of a three-lane road, or in the lane next to the center on a four-lane road only to overtake and pass on the right, vehicle, and then only when you are sure that everything is clear.

3. On multiple lane roads, drive in one lane. Don't change from one lane to another without looking back and on both sides. Be sure a car is not overtaking you at the side and to the rear—a blind spot in many automobiles.

4. In some cases it is legal to overtake and pass on the right, but this is not a universal rule. Even where it is legal, it should be done with care because drivers are not expecting it. Overtaking and passing on the right may be made when:

- The driver in front is making a left turn.
- On "one-way" streets
- On a pavement wide enough for two or more lines of moving traffic in each direction.

The new Uniform Act regulating traffic requires that all movement must be made "in safety." All drivers are therefore required by law to be alert at all times.

Sign on front gate of a house in Edinburg, Scotland: "Salesmen and canvassers barred. P. S.—Except those with free samples."

MODERN
METHODS

WILL Produce More

WITH MODERN MACHINES

Our more abundant way of life is largely due to the more economical production of our basic industry—farming—in providing food, fibre, and oils to feed a hungry world and to supply the raw materials for an ever-increasing number of industrial products. Farmers, realizing the increasing importance of economical production, are using Modern Methods to improve and to retain the fertility of the soil and thereby to increase production and farm income.

The MM trademark is recognized by

farmers everywhere as the symbol of quality. MM Modern Machines have established a reputation for economy, dependability, and outstanding performance. This is particularly true of MM Harvesters.

Your friendly MM dealer has the complete facts on MM Machinery, Tractors, and Power Units for farm use. See him the next time you are in town. MM equipment is worth waiting for!

OUR DEMOCRACY—by Mat

PLENTY OF "GET-UP-AND-GO"

AMERICAN "GET-UP-AND-GO" HAS MADE US STRONG—AND POINTS THE WAY TO FUTURE PROGRESS FOR OUR DEMOCRACY.

News In Canyon 25 Years Ago

(Taken from the files of the Randall County News of February 1, 1923)

C. E. Strain was elected band director of the Buffalo Band.

T. C. Thompson was elected first vice president of the Text Hardware and Implement Association.

John Knight held a public sale of his registered Duroc Jerseys. 26 head were sold at good prices.

Harvey Cash killed 14 Mallards from one flock of wild ducks near the Green Valley ranch.

W. F. Heller placed in the Panhandle-Plains Museum the Confederate flag which has been used for many years in the celebration in Canyon.

A bill has been introduced in the legislature to create the Texas Technological College.

W. A. Brasher bought an interest in the Palo Duro Lumber Co. and the name was changed to the Service Lumber Co. J. T. Service is the other owner of the business.

Canyon and Amarillo citizens are advocating that brick paving be laid between the two towns.

Latest doom weapon, according to Washington scientists, is carbon dioxide gas made with radioactive carbon 14. Rumored tests results: death within four days to any living thing; persistence of destructive action: 6,000 years; defense: use of synthetic air. Gas masks won't work since CO-2 is an integral part of natural air.

President Truman, with an election coming on, is tending to side against generals, admirals and diplomats in deciding the issue of the role to be played by the United States in Palestine.

I have "retired" several times. But no more. I am going to keep going, so long as people go to see my pictures and so long as I can keep my feet.—Fred Astaire, movie actor.

He Brings Music Stars, Seekers To Texas Towns

Metropolitan Opera singers, violinists, pianists and lecturers have long been appearing in the largest Texas cities but William Z. Rozan felt that these stars should be brought to smaller cities and towns as well — so Municipal Concerts, which Rozan heads, is bringing splendid artistic treats and general enjoyment to many Texas communities. Among the speakers is Boyce House, whose "column" appears in 200 weeklies, the author of "I Give You Texas." Inquiries should be addressed to Municipal Concerts, 3940 S. Main, Houston.

The fish have only dropped one game in that league this year, so far.

Playing for the team this year are Charles Wright, Bill Abbott, Bill Cross, Dean Wright, Homer Hill, Charles Richardson, Billy Cox, Paul Thompson, Don Briggs, Roy Lee Dunn and Jay Hammond.

Borden Price is coaching the fish.

HARDEN & HEATH

THANKS

We want to thank all those who cooperated with us to conserve natural gas during the recent cold spell.

We think our customers are entitled to know why supplies of natural gas ran short.

The emergency was not due to any mechanical or human failures. All the pipe lines, and all the machinery in our compressor stations, functioned properly. All employees discharged their duties faithfully throughout. We received good cooperation from those who supply us with natural gas.

The emergency shortage of gas was due largely to the simultaneous occurrence of two circumstances, either of which is most unusual in West Texas. The first of these situations was that temperatures dropped to sub freezing and to near zero and stayed there for about a week. Ordinarily, such cold spells do not last more than three or four days at most. The second situation was that the severely cold weather prevailed throughout our entire system at the same time. Ordinarily, a cold spell will move across our system from north to south or from west to east, with extreme temperatures prevailing in only a portion of the system at any one time.

Therefore, it was the combination of these factors that caused the emergency; first, that the severe cold spell was so prolonged; and second, that the cold spell prevailed throughout our entire system at one time.

We added more horsepower to the capacity of the compressor stations in our transmission system in 1947 than in any year in the company's history. This was done in anticipation of heavy demands for gas during the winter of 1947-48. What we did not anticipate was the above unusual combinations of circumstances. Even if we had been able to anticipate these circumstances, we could have done nothing about it, due to the difficulty of obtaining steel pipe.

The only community in which there was any interruption to residential gas service was Levelland, where about half of the homes were temporarily without gas. For two years, we have sought to build a larger-size pipe line to Levelland but have been unable to get anyone to accept an order for the pipe.

Through your cooperation, you have helped us and yourselves. Except in the case of the short interruption at Levelland, you have made it possible for residential gas service to continue without interruption.

Thank you again for your cooperation and understanding.

Bobcats and Bobbies Over Score
Canyon High Basketball Teams

Eagle's B String Downs
Dimmitt's Second Squad

With a tremendous scoring surge in the last quarter the Dimmitt Bobcats brought down the Canyon Eagles 50-30 in the Canyon Gym. The Bobbies also defeated the Eagles 32-19, the half-time score being 16-15 in favor of the losers.

This evening the games between the boys, each winning two apiece. The Dimmitt girls have won over the Eagles three times and lost to the Canyon setex once, in the finals game in the Tullia Tournament.

Hunter Scores
Carl Jowell was the high scorer of the evening with seventeen points, sixteen of them being made in the last half. Lonnie Rice, also a Bobcat, chalked up fourteen points. Canyon's Tommy Hunter racked thirteen to star for the Eagles. Tall, lanky Austell Burrus, who fouled off early in the final period, succeeded in scoring nine points.

Pat Tate, Bobbie forward, scored fifteen points, while Johnneen Bice, also of the Bobbies, crated twelve. Martha Jean Avent was high point for the Eagles with eleven. Mary Sue Foster starred on defense for the home team, while Cowan stood out for the visitors.

The Canyon "B" string flew over the Dimmitt "B" squad 40-32.

Little Joe Abbott repeated this basket six times for twelve points and Meade Michael was second with eight. Jowell of Dimmitt tied little Joe with fourteen.

SO ROUND, SO FIRM, SO FULLY PACKED—THAT'S SNOW BALLS
The classes were over and out on the street.

All the girls and teachers had to retreat.

Snowballs were flying all through the air.

Hitting hands, legs, faces and even your hair.

People driving by in cars are covered by snow.

Yes, indeed, it was a mighty low blow.

So, students, of our Canyon High School.

Don't be stubborn like an old mule. Let's keep our school slate clean and nice.

And don't throw any more of this snowy ice.

Then all the people will say we are swell.

Because we handle our affairs so well.

So stop before you end up in jail 'Cause we haven't the money to pay your bail.

Fire Prevention Is
Theme for Study

Fire prevention education as advocated by the State Department will be followed closely in the Canyon Public schools.

Each pupil in the seventh grade must write during the year a theme, or make a book, or poster, or some phase of fire prevention or fire protection.

Each pupil in the ninth grade must write during the year one theme on some phase of fire resisting construction.

Each pupil in the eleventh grade must write during the year one theme on some principle of fire insurance, fire prevention, or fire protection.

"We plan to emphasize fire drills during the second semester," says Mr. J. E. Miller, principal of the high school, "therefore, I believe the above requirement of the State Department if carried out, will cause our students to think in terms of fire prevention. We hope to work these projects into the English classes during the fourth six-weeks period. Three themes, three books, or three of the best posters from each group should be included in our exhibit material for the second semester."

Old Cal seems to be able to scrape up a bit of local romance even though we had only three days of school and all the cold weather.

Ava Dooley and Harold Martin carry on a conversation in Mr. Sanders' room. Katy Furlow would like to know what this is all about.

Teddie Howell and Tommy Gooch were having a swell time at the ball game Saturday night even if it wasn't an arranged affair.

Well! Well! Claude Money wanted his name in the paper, so here it is.

It seems that Richmond Payne is writing notes to Anita Ruthart every day.

Sue Ann Colwell, why don't you make up your mind between Don Hickman and Bill Davis?

Max Bellah was seen with ex-student Dorothy Gafford at the Eagles - Bobcats' game Saturday night.

Jerre Inman was seen escorting Bobby Jean Ford to the show Thursday night.

Well! Well! Carrol Wray Dickerson was seen with Dyann Hand recently.

Juanita Avent was with Gus Hawkins Friday night and with Gerald McDuff Monday night.

Dick Barrett and Suzanne Stephenson have up quite a case. (I hear.)

Billy Cunningham likes church, especially when Betty Graham is there. (It is rumored that Don Johnson is jealous.)

Stanley Schaeffer and Geneva Gressett are going strong. I hear they were at the show and also in church together.

A little birdie told me that Gladys Lowe is just simply crazy about that dashing red head, Donald Davis.

Mary Sue Foster was seen with a Tullia boy recently.

Wonder what this will come to. Jack Sparks and Betty Jean Schurte were talking in the hall Monday evening.

Jesse Higgenbotham and Louis Seay have up quite a case in study hall.

Quote "Merry Borden thinks Clifford Burtz is just wonderful," end of quote.

Senior Personality

Name: Martha "Willie" Wilson

58 Make Semester Honor Roll

Fayssoux Proves
Hypnotic Ability

Telepathy Powers Daub
Him Specialist in Field

Fayssoux, hypnotist extraordinary, mental telepathist and escape artist, will present a three-in-one program featuring hypnotism, telepathy and magic to high school students in the auditorium February 12, at 2 o'clock.

He has spent more than forty years perfecting his art, and the results of that forty years of arduous training and experience are evident in his show. In the heyday of vaudeville he was a headliner on Keiths and other leading circuits in the United States. His scrapbook reads like an atlas of America.

Had Fayssoux lived in olden times he would probably have been burned as a sorcerer, for his feats truly appear to be black magic, in telepathy they are bewildering. His control over a stage full of volunteer subjects, all strangers to him, is amazing. The hilarious things done by individuals under the influence of hypnosis are side-splitting.

Fayssoux is a sincere performer. He makes no attempt of mislead where his art calls for outright trickery or slight-of-hand. With hypnotism he is a serious student and has studied at several leading universities. It is a true science with him.

Fayssoux has pursued the study and investigation of this strange thing called telepathy through many years of his life and his baffling demonstrations will provide educational as well as entertaining interest.

Seniors Discuss
Farewell Gift

A committee of four seniors met Monday afternoon with Mr. T. L. Devin, sponsor, to make suggestions for a Senior gift to leave the school.

The following suggestions were presented to the class by the committee in class meeting last Tuesday: trophy case, senior class pictures in the hall to be re-framed and re-arranged, slide projector, record library, new stage scenery, bulletin board for hall, improved tennis courts, speaker's stand and chairs for stage and a nicolodeon. Other suggestions were given by class members.

Committee members, Frances Standley, Valeta Haines, Austell Burrus, and Clifford Burtz will make a final report after all suggestions have been made.

I talk in terms of bread and milk and shoes, and keeping the consumer in the buying market. Mr. Knutson wants to play this tax reduction game in diamonds. I say, let's play it in hearts.—Rep. Helen Gahagan Douglas (D-Cal.).

When Great Britain's troops move out of Palestine later this year they won't go home immediately. The suggestion is being made that they be held near by, ready for special duty in Greece if the Communist pressure on that country still runs strong then.

The faculty and student body of Canyon High School wish to express their regret to June Chain and her family on the loss of their home due to fire last week.

Principal States
Refinement Plan

Mr. James E. Miller, principal of Canyon High School, is requesting every instructor in the high school, to place special emphasis on school refinement.

In the first period classes within the next two weeks the teachers are asked to give a three minute talk on this subject. Students will then be assigned a three minute talk on this same subject and will have two or three days in which to do research.

"I am requesting that a general class discussion be held on this subject following the reading. The teacher will summarize the main points brought out in the general discussion," states Mr. Miller. "The teacher will then select the three best talks written and turn them into my office. Ten of the best of these turned in will be selected and the students writing them will be presented in an assembly program at a later date."

Book Review by Dr. Knott Is
Highlight for Teacher Group

Dr. A. K. Knott was the principal speaker at the regular meeting of the classroom teachers last Tuesday night at 7:30 p. m. in the home economics room of the high school building.

Dr. Knott's program was a review of a book the title of which was kept secret until after the meeting. Approximately twenty-four members and several guests braved low temperatures to be present.

Refreshments of congealed salad, bread and butter sandwiches, nuts and coffee were served by the four hostesses: Mrs. T. E. Beard, Mrs. Veal Iverson, Mrs. Ed Weeks, and Mrs. J. L. Gilmore.

Members Attend
Social for Class

Dancing and playing games with cards, dominoes and checkers were the different spots of attraction at the Junior class party held in the gym Monday night, February 2, at 7 o'clock.

A committee composed of Suzanne Stephenson, Peggy LaLoge, Gerald McDuff, Betty Ann Erwin and Bobby King was appointed by the chairman of the planning committee, Juanita Avent, to decorate the gym. Refreshments of soft drinks and doughnuts were served to the members of the class.

"I spotted a leopard yesterday." "Oh, you didn't either, silly, they grow that way."

Grade Notes

Carlton Clark, a member of Mrs. Murrell's second grade, withdrew to move to Lubbock.

Two pupils of Mrs. Goodman's third grade, Judy Cleavinger and Carolyn Davis, were absent last week because they were ill of the chicken pox.

Mrs. Wilford Taylor and Judy were visitors in Mrs. Usery's third grade.

Robert Hinson withdrew to attend school in Amarillo.

The members of Mrs. Cousins' fourth grade have been drawing snow scenes.

Dwayne Taylor moved to Friona.

Students of the Elementary Science class are studying a unit of electricity.

The Geography class is studying Greenland.

Mrs. Jones was absent from school Monday due to the illness of her son. Mrs. Larry Holman substituted in her absence.

Mrs. Roscoe Davis' second grade is cutting out Valentines.

Junior Hoopsters
Jump in Sports

Romping over Wayside basketballers by a score of 28-19, the Canyon High Junior team opened the season.

The junior team met the Wayside junior team on the home court at four o'clock. The game was played close the first two quarters with the score hanging 4-2 in favor of Wayside at the end of the first quarter. The juniors came back in the second quarter to rout the Wayside team from its leading position. Highpoint man for this contest was Carl Hair who zipped 7 opints through the hoop. He was followed closely by Buster who netted 3 field goals.

Mr. M. K. Young is coaching the junior team, which is made up of boys ranging in age from thirteen to fifteen.

Class Favorites, Parties Are
Main Subjects at Meetings

A junior class meeting was held during the last fifteen minutes of the fifth period last Friday to decide upon a date for the class party. The class agreed upon February 2, at 7:00 with the place in the high school gym.

Juanita Avent, chairman of the selection committee, chose a "Come as You Are" party.

Tuesday, during the last twenty minutes of the morning session at school, seniors, juniors, sophomores and freshman held class meetings to complete the selecting of favorites, one boy and one girl, for their annual sections. These favorites will be announced later.

New Endowment Plan Revealed

Dr. Condon Receives Letter From Carnegie Institute About Plan

Dr. S. H. Condon, sponsor of the International Relations Club, recently received a letter from Howard E. Wilson, associate director of the Carnegie Endowment for International Peace division.

Mr. Wilson stated, the Carnegie Endowment for International Peace is offering a fellowship for the academic year, 1948-1949, which is of particular interest to members of the International Relations Clubs.

A fellowship or "internship" was established a year ago to provide contact and experience with actual programs of the international relations for a student who has been active in an international relations club during the past year or years.

A fellowship will be awarded this spring. The recipient of the award will be attached to the staff of the Carnegie Endowment for the period September, 1948 to June 30, 1949. During that period the Fellowship will assist in the work of the International Relations Clubs as carried on in the Endowment offices.

The Endowment will also arrange to bring the fellow into contact with the Secretariat of the United Nations and with certain of the voluntary organizations having headquarters in New York city, working in the field of international relations. The fellow may arrange to take a limited amount of academic work in one of the institutions in New York. The Fellowship carries an award of \$1800, plus necessary traveling expenses.

Both men and women are eligible. Applicants should have completed their work for the Bachelor's degree before September, 1948.

Mr. Lewis, the present fellow, has recently evaluated his experiences and has suggested the following abilities as particularly appropriate for the holder of the Fellowship:

A knowledge of typing, and perhaps shorthand; and extensive knowledge of International Relations Club, their functions, programs, activities, and the ability to offer ideas for their expansion and effectiveness; a good background for and practical experience in journalism; a fair knowledge of the structure of similar organizations which are working in international affairs; ease when meeting new people and giving talks in public; receptivity to new ideas and criticism; and, the ability to get along with those with whom you come in contact.

White House insiders say that the real reason behind Truman's \$40 tax reduction proposal was to release Democratic Congressmen from supporting his expected veto of the GOP sponsored tax cuts. They reason that a coalition Republican-Democratic vote could override the veto anyway, and now Democratic legislators are free to solidify their positions with their constituents at home.

"Now, I want Albert to have a thoroughly modern and up-to-date education," says his mother, "including Latin."

"Yes, of course," said the headmaster, "though Latin, is, as you know, a dead language."

"Well, all the better. Albert's going to be an undertaker."

Gen. Lucius Clay, head of the U. S. Military Government in Germany, already is running into serious trouble with the French in trying to encourage economic revival in Germany. The French prefer to keep German industry on a very low level even if the cost to U. S. taxpayers runs into the billions each year.

Dr. Cornette Has Busy Schedule

Dr. James P. Cornette, president-elect of WT, is scheduled to appear before several groups in the near future.

Today he is speaking to the Tulla Kiwanis Club and is to be the toastmaster for the athletic banquet to be held soon. Date for the banquet is still uncertain. Thursday morning he is to speak for the first time

to the students of West Texas in assembly.

Last Friday he spoke to the Rotary Club at Hereford; Monday to a personnel group of the Panhandle Industrial Manufacturers and Sunday to officers of the WT Ex-Students Association.

Need money? Then try this one: A man wants three dollars and has only two smackers. He pawns the two bucks for \$1.00 and sells the ticket to another fellow for \$1.50. Now he has three bucks. Simple!

Nearly 1200 Start Second Semester

According to the Registrar's office and business office, enrollment at WT for the second semester is nearing the 1200 mark.

The count is not yet complete, said an employee of the business office, because not all the students have yet paid their fees and no student is considered completely enrolled until his fees are paid up in

full. Frank Morgan, acting registrar, revealed that about 150 new students enrolled for the second semester, including some students who were here before and some fresh-

One reason why American officials doubt that Soviet Russia is ready to take over Berlin is to be found in the Ruhr. The Russians still hope for a hand in managing the Ruhr, but that hope would be blasted if British and Americans were forced out of Berlin.

WHY HOTPOINT REDUCES PRICES NOW!

One of Nation's Largest Appliance Manufacturers Joins in Fight to Curb Inflation by Announcing Price Cuts of as Much as 10% on America's Finest Electric Ranges, Refrigerators, Dispos-
alls and Water Heaters --- Effective Immediately

UNDOUBTEDLY the greatest current threat to America's progress and prosperity is inflation . . . if unchecked, spiralling prices and wages threaten to wipe out many of the gains made by this country. In an effort to check this threat, the General Electric Company has taken the initiative by reducing prices on many of its products. With a firm conviction in the soundness of this program, Hotpoint — an affiliated company of General Electric — is proud to join this crusade by announcing sweeping price reductions on practically its full line of household appliances — effective at once.

This voluntary price reduction — amounting in actual savings to you of as much as \$20 on some items — is being made purely in the public interest. And some of the greatest savings are on the most popular-priced models. We expect to maintain these prices provided there are no further increases in our costs of labor and materials, and that there is no distortion of materials through rationing or new allocations.

Never have Hotpoint products been more in demand. Despite the fact that new production records are being made — through the most significant expansion program in the appliance industry — the

demand still continues to out-pace our ability to supply. Dealers all over the country report that more and more people are placing orders for Hotpoint products, and that they will not be satisfied with some other brands that may be more readily available.

Equally significant is the fact that these price cuts apply to Hotpoint's brand new 1948 models, most of which have just recently been introduced with many new features . . . appliances which dealers and the public alike acclaim as truly "post war" appliances.

Hotpoint accepts the responsibility that goes with leadership in the appliance industry by making this precedent-shattering move. We hope that other manufacturers join this movement to curb the cost of living. We hope, too, that every American citizen will do his or her part by spending less money for unnecessary things . . . by buying cautiously . . . by adding to their savings instead of drawing on them . . . and by doing all the other things that tend to force prices downward. Only by such action can we preserve the American standard of living which has made this country the envy of the entire world.

Curbing inflation is everybody's business . . . it's up to every one of us to do his part.

Pres. Hill Invited to UN Institute

President J. A. Hill was honored
last week when he received an
invitation from the National Ed-
ucators Association to attend a
United Nations Institute at Lake
Success, New York, Feb. 26, 27,
and 28.

General purpose of the Institute
is to give some of the outstanding
educators of the United States an
opportunity to study first-hand the
work of the United Nations and its
related agencies.

Dr. Hill will be able to hear dis-
cussions at meetings of the Security
Council and the United Nations Ed-
ucational Scientific and Cultural
Organization and will get to talk

with some of the members of these
groups.

Also open to those visiting educa-
tors will be exhibits of books and
visual aids used by the various coun-
tries represented in the United Na-
tions.

Entertainment will include a
dinner-meeting at the Waldorf-
Astoria Hotel in New York City.

Sponsoring the institute will be
the New York University School of
Education and the invitation was
sent to Dr. Hill by Earnest O. Mel-
by, dean of the School of Educa-
tion.

Dr. Melby said in part in his letter

of invitation:

"I am enclosing with this letter
an unusual invitation. You are
among those educational leaders who
have been invited to attend the
United Nations Institute. The In-
stitute will permit you to observe
the Security Council and the other
organs of the United Nations in op-
eration, to hear and talk with in-
ternational leaders from the world of
nations. There will be other sessions
at which you may have the opportu-
nity to observe school and college
programs dealing with the United
Nations."

Dr. Hill said he accepted the

invitation and that he is looking
forward to a "valuable and inter-
esting three days at the United
Nations headquarters."

Among the noted men Dr. Hill
will see and hear will be Warren R.
Austin, permanent representative of
the United States to the United Na-
tions; Trygve Lie, Secretary Gen-
eral of the United Nations; Jan
Papanek, permanent representative
to the United Nations from Czecho-
slovakia and other renowned world
leaders.

All dinners will be served at the
United Nations headquarters cafe-
teria at Lake Success.

All our beaches in Natal are filled
with vacationists. All our coast re-
sorts are in the midst of the biggest
spending orgy since before the war.

THE STATE OF TEXAS

To: Percy Walters, whose residence
is unknown. Greetings:

You are commanded to appear and
answer the Plaintiff's petition at or
before 10:00 A. M. of the Monday next
after the expiration of 42 days from
date of issuance hereof, the same
being at or before 10:00 A. M. on the
15th day of March, A. D. 1948,
before the Honorable District Court
of Randall County, Texas, said Plain-
tiff's Petition was filed on the 28th
day of April, A. D. 1947.

The File Number of said suit being
1971.

The style of the case is Maude
Walters, Plaintiff versus Percy Wal-
ters, Defendant.

The nature of the case is as fol-
lows: Plaintiff seeks a divorce from
Defendant, dissolving the marriage
between Plaintiff and Defendant, on
grounds of cruel treatment of Plain-
tiff by Defendant of such nature as
to render their further living to-
gether insupportable. Plaintiff asks
that community property homestead
of Plaintiff and Defendant located
on Lots Eleven (11) and (12), Block
Sixty (60) of the Original Town of
Canyon City, Randall County, Tex-
as, be set apart and full title vested
in Plaintiff and her minor son,
Richard Walters, and that all title
be divested of Defendant in and to
such described property.

This citation is to be served by
the Sheriff, by making publication
of this citation once in each week
for four consecutive weeks previous
to the return date hereof, in some
newspaper published in Randall
County, Texas, the first publication
to be at least twenty-eight (28) days
before the return day of the citation.

Issued this 27th day of Janu-
ary, A. D. 1948.

T. H. LAIR, Clerk of District
Court of Randall County, Texas.
Given under my hand and seal of
said Court, at office in Canyon,
Texas, this 27th day of January,
A. D. 1948.

(Seal) T. H. LAIR,
Clerk District Court,
Randall County, Texas.

While driving out through the Fort
Stockton country, I got drowsy.
I had been counting the sheep.

A spring at Fort Stockton, known
as the Comanche Chief, pours out
35,000,000 gallons a day, Clyde Smith,
insurance man, said. A smaller
spring was the water supply of the
old fort. The one-time ammunition
building still stands; in fact, it is
in use by the Boy Scouts. It is a
rock structure. A building which
was used as quarters by the officers
is now a residence and I was told
that the interior had been modern-
ized until it is the most beautiful of
any home in the city.

Another very attractive home was
built from rocks that were gathered
from the grounds of the abandoned
fort.

It's time that some fairness was
introduced into Congressional hear-
ings.

This business of browbeating sov-
ereign American citizens by some
man who is a member of Congress
and therefore is supposed to be our
servant ought to be changed at least
to the extent that the citizen shall
have the right to hit back.

A Congressman can bulldoze a
business man, for example, and then
refuse him the right to introduce
witnesses to support his position and
to uphold his good name. He isn't
even allowed to cross-examine some
irresponsible individual who may
have it in for him and gets before
the committee and makes untrue,
unsupported accusations.

The idea that Howard Hughes had
to write out the questions he wanted
to ask and submit those questions
to the committee chairman for his
approval or rejection is repugnant
to the American spirit of fair play.

That's one reason why this coun-
try rocked with applause for the
tall Texan who refused to be brow-
beaten and stood his ground and
slugged in true Texan style until
that durnyankee Senator tucked his
tail and ran.

Senator Arthur Vandenberg is
running into serious trouble in his
effort to keep foreign policy out of
the 1948 election campaign as a
major issue. The drift within the party,
as indicated in Congress, is strongly
toward a break with Mr. Truman on
the size and extent of foreign aid.

Railway Freight Sets New Mark

Lines Establish Peacetime Record Despite Bad Box Car Shortage.

NEW YORK. — The railways hauled more freight more miles in 1947 than ever before in peacetime — but without stilling the clamor of shippers.

Shortage of freight cars persisted, but showed signs of easing at the year's end as output of new units neared 10,000 a month.

Hundreds of new passenger cars went into service and streamliners became a common sight on many secondary runs—but travelers still found some reservations hard to get.

Freight rates and passenger fares advanced—and the carriers said the added revenue was largely offset by higher labor and material costs.

Twin measures of rail service performed are the passenger-mile (transporting one passenger one mile) and the ton-mile (moving one ton of freight one mile).

The railroads estimated 1347 passenger-miles at 44,789,600,000, around 30 per cent below the preceding year.

Carried the Freight.

As the 10,000-a-month goal was approached, the program's sights were raised to a 14,000-a-month level to be attained in 1948.

More than 800 gleaming new passenger train units were turned out by builders, enabling the railroads to offer day coach travelers unprecedented comfort and luxury on principal and many secondary runs.

Lack of this equipment was a factor cited as delaying the inauguration of through coast-to-coast trains, a normal outgrowth of the transcontinental sleepers placed in service in 1946.

To facilitate travel, most of the country's major lines in 1947 inaugurated credit systems under which more than 25,000 companies and individuals now holding cards may obtain tickets without cash and pay for their purchases at the end of the month.

Revived from prewar days were rail-auto service (providing a car for use at the end of a train trip) and travel loans, whereby banks advance vacation funds which can be repaid in installments.

The railroads' prize performance of the year was in the freight field. Operating with 27 per cent fewer cars than in 1929, with total carrying capacity some 20 million tons below that prewar peak year, the railroads piled up an estimated 647,358,500,000 ton-miles, which was 45 per cent above the 1929 total.

Seek Efficiency.

Prospects for 1948 are cloudy. William T. Faricy, president of the Association of American Railroads, says:

"According to the best estimates now available, railroad freight traffic during the coming year will be 2.7 per cent less than it was in 1947, and passenger traffic will decline 12.8 per cent."

"The railroads' financial situation during 1948 will depend largely on the outcome of their petition for increased freight rates adjusted to rising costs."

Despite their record freight carrying performance, which was made possible by larger cars, longer trains and more efficient handling, the railroads were unable to keep pace with the swiftly expanding national economy.

The shortage of box cars became the worst in 20 years.

Under the government auspices, a "task committee" of steel makers and car builders undertook to channel to car plants enough steel to produce 10,000 freight cars a month. The corner was turned finally in September when for the first time since the war car deliveries exceeded retirement of over-age units.

Men Feel Sorry for Women, Say Their Life Much Harder

NEW YORK.—A woman's life is harder than a man's and, surprisingly, more males subscribe to that view than do women.

This is revealed by a national magazine which says that a poll in three populous eastern states, New York, Pennsylvania and New Jersey, showed 62 per cent think a woman has a harder life than a man. Twenty-five per cent believe the opposite to be true.

But the proportion who think a woman's life is harder was slightly higher among men than among women. Thirteen per cent think men and women have it equally as difficult.

Father of Four Veterans

Builds Church in Gratitude

COMSTOCK, MICH. — Herman Meints, celery grower, felt so thankful for the safe return of his four sons from military service a year ago that he decided to build a church.

Without previous building experience, Meints single-handedly erected a neat cement-block structure which he called the Comstock Bible church. A congregation grew.

Meints preached the first sermon, conducts four services a week as an ordained elder and uses his own trucks to take children to Sunday school.

Father: "Johnny, what makes you skip school all the time?"
Johnny: "Class hatred."

SHORT STORY

Ten Minutes Late

By
AAGE V. HOVMAND

THE evening was dark when at 11 o'clock Head Signalman Petersen arrived at the signal box for duty.

"Evening, Hansen! Any news?" Petersen took off his cap and coat. "They say Sivertsen's out."

So this was it! Sivertsen had been his mate but Petersen had had to report him. Sivertsen had been given a year in jail. He had threatened to get revenge.

"Nothing else to report, Hansen?"

"Eight cars from the brick works."

There was no room in the freight siding. They're on line No. 2 waiting to be picked up by the early morning freight. That means no through trains on line No. 2.

Hansen had gone. Petersen was alone. Keep calm, he told himself. He lit his pipe and began to read the paper. The night express was due to pass at 11:27; at about 11:20 it would be signalled through from the junction.

He raised his head to glance at the clock and stared sideways into the muzzle of a revolver. He felt his scalp shrink.

Behind him came Sivertsen's ugly voice. "Put your hands behind you."

Petersen could feel his hands being tied to the back of the chair.

Suddenly the phone rang. Sivertsen lifted the receiver. "Right . . . all clear!" he said. The word was that the night express was passing the junction.

"I see you still have the bad habit of parking cars on line No. 2," grinned Sivertsen. He switched the main line over to line No. 2 and lowered the signals.

PETERSEN shouted in terror.

Sivertsen said: "What'll happen when the fast express hits those cars? And what'll happen to the man responsible? Perhaps you'll try to convince the prosecution that you're not guilty? That I was there with a knife and cut you loose and ran off with the rope the moment it happens?"

Sivertsen lighted a cigarette. "I'm going down to see if the cars are properly braked. Then it'll work better."

Petersen was deathly pale. He was speechless. "What are you glaring at?" sneered Sivertsen. "Want a smoke to steady your nerves a bit, is that it?" He thrust a cigarette into Petersen's mouth, lit it and was gone.

Petersen puffed automatically at the cigarette. Shout for help? Useless, there was no one near.

Four feet away from him was the signal lever. Move it and the express would be saved. But he could not move his hands. He knew that 200 yards away two green lights were signalling all clear. And 500 yards further on was another signal indicating there was no danger.

11:34! Sivertsen had received the junction's news of the express at 11:30. It would be here at 11:37.

Petersen could feel his hands being tied to the chair.

Petersen tried to bend forward. The rope tightened round his wrists. Now with his cigarette he could nearly reach the rope across his knees. The cigarette was half finished. He puffed vigorously and the glow increased.

He pressed it against the rope with desperate energy, drawing deeply. He heard the faint cracking sounds as the threads of the rope broke. But he heard another sound too, farther away, the whistle of the express.

With all his might he stretched his knees and the rope broke. He could stand upright and in feverish haste he freed his hands. A glance out of the window showed him the lights of the approaching train.

Dragging the chair with him he threw himself on the signal lever and changed it to red. But the engine was already passing under it and the engine driver noticed nothing.

Like lightning he grabbed another lever and changed the points to connect up the main line.

Five seconds later the express passed safely by. A streak of light from its windows marked its course through the night.

Petersen looked at the clock. 11:37! Ten minutes late!

Then he collapsed on the chair.

Suggested theme song for a butter shopper: "Don't Get a Pound Much Anymore."

Siamese Twins

Justice William O. Douglas of the Supreme Court is not jumping at the chance to be second man on President Truman's ticket in 1948. Friends of the Justice point out that he would be expected to give up a \$25,000 life-time job for the privilege of presiding over the U. S. Senate in case he could help win a hard election.

Dwight Griswold, U. S. administrator in Greece, is advising George Marshall, Secretary of State, that this country either has to go more deeply into Greece with dollars, goods and advice, or pull out. The decision is going to be to ask Congress to put up several hundreds of millions of dollars more to try to get Greece back on its feet.

INJURED

McCarter Hurt By Fall on Ice

Thomas B. McCarter, professor of physics and head of the department at West Texas State, was seriously injured last week when he slipped and fell on the ice which surrounded the campus.

Mr. McCarter is in Neblett Hospital recovering from a fractured hip received from the fall.

He has been connected with West Texas since 1918 when he came here as professor of mathematics. He remained at that position until 1923 when he became head of the physics department.

D. A. Shirley, Dean of the School, said that nothing had been decided yet as to an immediate substitute for Mr. McCarter.

Many students and other faculty

members have also reported falls on the treacherous ice around Canyon, but none of the others seem to have been seriously hurt.

Each member of Congress whose name is to appear on the list of those who have had an interest in commodity markets is to have a separate explanation. Leaders of both Democratic and Republican parties have conferred over the method of treating disclosures that may be made.

Senator Homer Ferguson, of Michigan, is striking political pay dirt for Republicans in turning up records of speculation by public officials. Members of Congress seem surprised at the degree of public reaction to disclosure of trading in commodities, which had appeared to be taken for granted in the past.

Joseph Stalin's new strategy is to go easy with gestures that alarm American voters, at least until after Congress has made up its mind about what to do with the Marshall Plan for helping Europe. Russian strategy may be to tread softly until after the United States elections are held in November.

Walter Reuther's United Auto Workers will probably launch the third round of wage increases, demanding an across-the-board 15% hike. Every effort will be made by the CIO union to avoid a strike and Reuther's negotiators will settle happily for an 8% boost.

Lieut. Gen. Walter Bedell Smith, Ambassador to Russia, is No. 1 man in line for the job of High Commissioner when and if the State Department takes over from the Army in administration of Western Germany.

ON THE SQUARE

Fifty-Five Make WT Honor Roll

Fifty-five students of WT were honored at the end of the fall semester by having their names on the college honor roll.

Of that number nine were freshmen, 21 were sophomores, 17 juniors and eight seniors.

Those on the roll who earned five or six A's get four grade points; those with four or five A's and one B 3.83 grade points and those with four A's and one or two B's get .8 or 3.7 grade points.

Those on the fall semester honor roll were:

6 A's: John Vincent Huber, Bert Alfred Masters, Jim Dan Pavillard, Mary Lois Scott.

5 A's: Herschel Lee Allen, Mary Virginia Bailey, Juanita Bell, Johnnie Fay Cressens, Vergie Haines, Louis Henders, Bob DeWitt Leachman, Patsy Ruth McIntyre, Elizabeth Ann Miller, Mary Eileen Phillips, Mrs. Lela M. Thompson, Lin Isom Welch, Carolyn Wimberly.

5 A's, 1 B: Curtis Edward Babcock, Glynn Hollis Bunch, Leonard Herman Gerhardt, James P. Linn, John R. Stoneman.

4 A's, 1 B: Grace Almedia Boyd,

Betty Sue Brotherton, Pat Edward Campbell, William Winston Carter, Mary Leatrice Cherry, Jo Nell Coose Corder, Ann Crawford, Steve Edwin Davidson, Odell Davis, Earlene Marie Eustace, Lewis Florence, Wilma Lee Francis, Hubert Hardin, Betty June Euler, Geneva Flo Hammons, Jerry Jacobs, James E. McCabe, Stanley McDade, Doris Jean McManigal, James Edwin Morgan, Edith Mae Morrow, Virginia K. Odeneal, Ruth Patman, Maurice Risley, Frances Lynn Townes, June Wimberly.

4 A's, 2 B's: Edgar Richard Brown, John C. Frisby, William O. Latson, Herman Oscar Schuette, Elmer Schultz, William Mack Stallings, Leslie Talbert.

Moscow talks about warmongers. We have disarmed quicker than any nation in history. Our Navy today is unable to take on an engagement of any significance. Our Air Force is below the 70 air group minimum, and our Army is unable to have even one division which is immediately ready to take on a mission—Sen. Henry Cabot Lodge (R-Mass.).

Marriner Eccles, Chairman of the Federal Reserve Board, is to be reappointed to that job when his term expires in the near future. There has been some banker opposition to Mr. Eccles' reappointment, but the White House is not impressed by it.

Ancient Epic Tells Of 'War on Nerves'

Clay Tablet Is Believed Oldest Sumerian Literature.

ISTANBUL, TURKEY.—The existence of a clay tablet upon which is inscribed the longest Sumerian epic poem known—and probably the oldest such piece of literature ever discovered — has been disclosed here.

The square tablet, while smaller in size than a piece of ordinary type-writing paper, still is one of the largest Sumerian literary tablets in existence. By dividing the piece of clay into six columns on each side and using a minute script, the ancient author squeezed 639 lines of his poem on the tablet.

Dr. Samuel N. Kramer, associate curator of the Babylonian section of University museum at Philadelphia, copied and interpreted the poem, which he has titled "Enmerkar and the Lord of Aratta."

The poem far surpasses in age the classic Greek epics of the Odyssey and the Iliad. Kramer predicts a long discussion between scholars over exact translations but he has satisfied himself as to the tale related.

He says it tells the story of a political victory more than 5,000 years ago in which King Enmerkar of Erech, one of the more important of the Sumerian cities, used a system of "war of nerves" much like that used today.

The king sent his ambassador over seven mountain ranges to the city of Aratta, located either in Persia or western India. Enmerkar first makes sure that he has the support of the goddess Inanna—Sumerian counterpart of the Greek goddess Aphrodite.

Then back and forth between Erech and Aratta his emissary travels, applying political pressure both by threat and subtle persuasion, until, finally, the morale of the people is broken and the city falls as vassal of Enmerkar.

Sumerian is one of the oldest written literatures known. Settled near the Persian Gulf, the Sumerians developed a high civilization which reached its peak between 3000 and 2500 B. C. It was about this same period when the Egyptian culture ripened, but scholars today have a much better picture of Sumerian literature than that developed along the Nile, at least for this earlier period, because Egyptians wrote on parchment that stood little chance of preservation.

Ozone Protects Man From Sun's Fatal Rays

CHICAGO.—Ozone, a gaseous form of oxygen that is most prevalent 60,000 feet in the atmosphere, is mankind's greatest protection against the sun's dangerous rays.

Dr. Marcel Schein of the institute of nuclear studies at University of Chicago, one of three institutes in a new 12 million dollar nuclear research program under way here, reports ozone makes it possible for human beings to expose themselves to the sun's rays. Without ozone, it probably would be necessary for people to live underground to avoid the deadly rays of the sun.

Boy, 8, Fights Way Through Drifts to Save Father's Life

CRANSTON, R. I.—A motherless, 8-year-old boy struggled over three-quarters of a mile of drifted road to summon aid that saved his father from death in a snowbound house on the outskirts of this city.

William Robinson Jr. was awakened by the cries of his father, 47, who had suffered a heart attack in the night. The boy dressed hastily and set out alone to buck waist-deep drifts to the Harry F. Kirby home. Dr. Max Fershtman said the boy's action and prompt police response saved Robinson's life.

A police bulldozer cleared a path for an ambulance from the highway to the Robinson home.

Snake in Her Furnace Poses Hard Problem for Housewife

MEMPHIS.—Whom do you call when you find a snake in the gas floor-furnace?

Mrs. N. H. Stevenson tried the gas company, but the gas company does not remove snakes.

She called the fire department, but the firemen ditto.

She dialed information. The phone company doesn't either.

"Why don't you try the company you bought the furnace from?" asked information.

Sure enough, the company has a clerk who likes snakes. He took the snake away in his bare hands.

War Gas to Fight Disease; Report on Mustard Nitrogen

CHICAGO.—A rare but usually fatal skin disease has been treated successfully with nitrogen mustard, the war gas chemical, a group of doctors reported in the Journal of the American Medical Association.

The disease, known as mycosis fungoides, causes hard, reddish tumors to develop on the skin.

Nitrogen mustard has been "extremely effective" in removing the tumors and stopping the itching caused by the disease, the doctors said.

Already the sinister light of a new conflict flashes on the horizon.—Pope Pius XII.

CONTEST

WIN AN ALL-EXPENSE LUXURY TRIP TO HOLLYWOOD

WATCH FOR Hal Wallace's Production "I WALK ALONE" Starring BURT LANCASTER & LIZABETH SCOTT A TERRIFIC PARAMOUNT PICTURE

CONTEST RULES AND INSTRUCTIONS

1. Entries must be aged 15 or over. Professional experience not necessary. Submit snapshot or other photo; head and bust or full figure views okay. On back of picture, typewrite or print plainly in ink, this information: full name, street number, zone, city and state; also correct age, weight and measurements (in inches) of height, bust, waist, hip and ankle. 2. All entries must be in our hands or postmarked on or prior to March 2, 1948. Submit through any Dr. Pepper dealer regularly serviced by a Dr. Pepper routeman; or in person or by mail to nearest Dr. Pepper Bottler; or by mail direct to Dr. Pepper Company, Box 5086, Dallas, Texas. 3. The Talent Department of Paramount Pictures, Hollywood, will pick the winners and their decisions will be final. Four first choices, and one alternate for each (or more if necessary) will be selected. If, for any reason, any first choice selection may prove not eligible, the next succeeding alternate, or alternates for each respective place, will win. 4. Before finally being adjudged a winner, entrant must execute, if requested (jointly with husband if married), a written contract, agreeing to model for the 1949 Dr. Pepper Calendar and consenting to the use of her name and picture on calendar and in any other publicity or Dr. Pepper advertising, without compensation other than expenses, entertainment and opportunities mentioned herein. If winning entrant is under legal age, such contract must be executed by a duly appointed guardian jointly with the entrant and her parents. All photographs become the property of Dr. Pepper Company and none will be returned. 5. Hollywood trip includes luxurious train or plane travel with incidental expenses paid. During Hollywood stay, girls will be chaperoned by reliable escort service. Famous beauty and fashion salons will groom girls for posing (gowns and accessories for temporary use). All normal expenses paid for hotel, meals, taxis, selected shows, night clubs, etc. Time away not exceeding one week. 6. All employees of Dr. Pepper Company, its advertising agency, Dr. Pepper Bottling companies and members of their immediate families are barred. Contest closes March 2, 1948. As soon thereafter as Paramount Talent Department can make its selections and eligibility (under rule 4 above) is established, winners will be notified by mail.

CONTEST CLOSING MARCH 2, 1948

Ely Culbertson Will Discuss Peace Plans Next Monday at West Texas State Auditorium

Ely Culbertson, world famed author, internationalist and bridge expert, will speak in the Administration Auditorium Monday night at 8:15. Subject of his talk will be, "Our Fight for World Peace," or "Must We Fight Russia?"

Culbertson, first man to devise a definite plan for a world governing body, will speak as part of the lyceum program sponsored by the Student Senate.

He has written several books both on literary and political subjects, including his autobiography, "The Strange Life of One Man," "Summary of the World Federation Plan," "Our Fight for Total Peace," and his current best seller, "Must We Fight Russia?"

He became world famous as a bridge authority when he created the Culbertson (Approach Forcing) System in 1930. He later organized Contract Bridge as a national industry and employed over 10,000 teachers and specialists to instruct 20,000,000 bridge players.

A sixth generation American on his father's side and the grandson of a Cossack general on his mother's side, Culbertson speaks eight languages and since his early youth chose as his life work the field of social sciences and mass psychology. Bridge is his hobby and the by-product of his real profession, which is that of a social engineer.

Colleges and Educator's conventions all over the country have hailed him as one of the only men with an ability to present an analysis and solution of the problem of lasting peace in terms so glowing as to be unprecedented.

More than a dozen times he has appeared as guest on many of the such leading radio forms as Town Meeting of the Air, American Forum of the Air and Northwestern University Radio Forum.

This is the first lyceum program for the year and students will be admitted by their activity tickets. Other students who wish to attend will be charged 50 cents and adults a dollar.

P-TA Congress Outlines Policies For Operation

The executive committee of the Texas Congress of Parents and Teachers, at its midwinter session in Austin, decided to announce to the general public the policy of the Congress in regard to its relationship with its cooperating agencies. The committee felt that this information was apropos at this time in order to clarify some erroneous conceptions about the function and policies of the parent-teacher association.

The bylaws of the Texas Congress read as follows (Article III, Section 3): "The Texas Congress or any of its divisions may cooperate with other organizations or agencies active in child welfare but shall not enter into membership with nor lend financial aid to nor cooperate in financial drives with any but Congress units."

The state handbook of the organization states that the parent-teacher association "shall not lend financial aid to other organized groups, become a party to any financial agency or serve as an advertising medium to any commercial concern, furnish workers for financial campaigns for other organizations that exist and function for their own purposes."

Mrs. L. W. Hughes, President of the National Congress of Parents and Teachers, recently declared that "parent-teacher funds should always be used for parent-teacher work. Every P. T. A. has its own program of child welfare, home-school cooperation, and community betterment. These programs are so important and so comprehensive that there is always a place for parent-teacher funds."

"We do not ask other organizations to make donations to help us with our programs. . . . We are not a money-making or money-raising organization. Thousands of our members are interested in other worthy causes and do contribute generously to them but they do so as individuals."

Condron To Speak To Amarillo P-TA

Dr. S. H. Condron, head of the economics and government departments, will address the Parent-Teachers Association of the Horace Mann School in Amarillo Tuesday afternoon, Feb. 10.

In support of the nation wide effort of Parent-Teacher Associations and civic organizations to arouse interest in government affairs, Dr. Condron will speak on "Your Government Is You."

Dr. Harper Speaks To AAUW Group in Pampa

Dr. Pleas Harper, head of the modern languages department spoke to a Founder's Day Dinner for the Pampa chapter of the American Association of University Women last Wednesday night.

The subject of his talk was "North America Looks at South America." The banquet was held at the cafeteria of the high school.

Mr. Truman is being told by top military and State Department officials that U. S. should wriggle out of its commitment to help set up a Jewish state in Palestine just as fast as it can wriggle. The President is warned that the alternative will be increasing difficulty in developing vital oil resources of the Middle East.
